**PREAMBLE & CODE OF CONDUCT FOR THE WELFARE OF THE HORSE** ........................................... 5

1. **OBJECT AND GENERAL PRINCIPLES OF VAULTING** ................................................................. 76
   1.1 General ......................................................................................................................................... 76
   1.2 Ground Jury ................................................................................................................................. 76
   1.3 Time, Music, Bell ......................................................................................................................... 76
   1.4 Explanation of the Marks ............................................................................................................ 9

2. **HORSE SCORE** ................................................................................................................................. 10
   2.1 General ......................................................................................................................................... 10
   2.2 Quality of Canter and Quality of Training .................................................................................. 10
   2.2.1 Rhythm (with energy and tempo) ........................................................................................... 11
   2.2.2 Relaxation (with elasticity and suppleness) .......................................................................... 11
   2.2.3 Connection .............................................................................................................................. 11
   2.2.4 Impulsion ................................................................................................................................. 11
   2.2.5 Straightness .............................................................................................................................. 11
   2.2.6 Collection ................................................................................................................................. 12
   2.3 Vault Ability of the Horse (execution) ......................................................................................... 12
   2.3.1 Willingness and obedience ...................................................................................................... 12
   2.3.2 Balance in tempo (forth/back) ............................................................................................... 12
   2.3.3 Balance in circling (in/out) ..................................................................................................... 12
   2.4 Lunging Criteria ............................................................................................................................ 13
   2.4.1 Lunger’s Position ...................................................................................................................... 13
   2.4.2 Lunging Aids ............................................................................................................................ 13
   2.4.3 Side Reins ................................................................................................................................. 13
   2.4.4 Presentation and Equipment ................................................................................................. 13
   2.5 Entry, Salute and Trot Round ...................................................................................................... 13
   2.5.1 Entry, Salute, Horse Preparation, Assessment of Trot (Trot Round) and Timing ........................ 14
   2.6 Score of the Horse ....................................................................................................................... 14
   2.6.1 Quality of Canter, quality of training (Score A1) ................................................................. 16
   2.6.2 Vault Ability of the Horse (execution) (Score A2) ................................................................ 21
   2.6.3 Lunging (Score A3) ................................................................................................................ 24

3. **SCORING EXERCISES** ..................................................................................................................... 25
   3.1 Types of Elements in Vaulting ...................................................................................................... 25
   3.2 Glossary of the Biomechanical Terms ....................................................................................... 25
   3.3 Scoring of the exercises ............................................................................................................. 26
   3.3.1 General Criteria ....................................................................................................................... 26
   3.3.2 Essence of an exercises ........................................................................................................... 27
   3.3.3 Reference Scores and General Deductions (set-up of the scores) ....................................... 27
   3.3.4 Harmony with the Horse ....................................................................................................... 28
   3.3.5 Body Control & Posture ......................................................................................................... 29
   3.3.6 Quality of Movement ............................................................................................................. 29
   3.3.7 Balance ..................................................................................................................................... 30
   3.3.8 Flexibility .................................................................................................................................. 30
   3.4 Specific Deductions in Compulsory (Comp) and Technical (Tech) Exercises ......................... 31
   3.5 Falls in Free Test and Technical Test ......................................................................................... 32
   3.6 Counting the Canter Strides ...................................................................................................... 33
4. **COMPULSORY TEST** .................................................................................................................. 3425
  4.1 General ................................................................................................................................. 3435
  4.2 Description of the Compulsory Exercises and Scoring Criteria ......................................... 36
  4.2.1 Vault On ............................................................................................................................ 36
  4.2.2 Basic Seat .......................................................................................................................... 4041
  4.2.3 Flag ................................................................................................................................... 43

  4.2.5 Mill ................................................................................................................................... 4647
  4.2.6 Half Mill ............................................................................................................................. 4950
  4.2.7 Scissors Forward .............................................................................................................. 4950
  4.2.8 Scissor Backward ............................................................................................................. 5455
  4.2.9 Swing Backward, followed by dismount to the inside ...................................................... 5859
  4.2.10 Stand ................................................................................................................................ 6061
  4.2.11 Free Kneel ....................................................................................................................... 6465
  4.2.12 Flank 1st part ................................................................................................................... 6566
  4.2.13 Flank 1st part followed by dismount to the inside .......................................................... 6869
  4.2.14 Swing forward – legs closed ......................................................................................... 6869
  4.2.15 Swing off from seat astride to the outside ................................................................... 6970

5. **FREE TEST** ..................................................................................................................................... 7475
  5.1 Requirements of the Free Test .............................................................................................. 7475
  5.2 Structure Groups of Free Test Exercises .............................................................................. 7475
  5.3 Criteria for the Technique Score ......................................................................................... 7475
  5.3.1 Performance ....................................................................................................................... 75
  5.3.2 Degree of Difficulty – General ......................................................................................... 7677
  5.4. Artistic Score ......................................................................................................................... 7678
  5.4.1 General ............................................................................................................................... 7778
  5.4.2 CoH – Consideration of the Horse, and Harmony with the Horse ................................. 88
  5.4.3 C1 – Variety of Exercises – Individuals ........................................................................... 89
  5.4.4 C2 – Variety of Positions – Individuals ............................................................................ 91
  5.4.5 C1 – Variety of Exercises – Squads and Pas-de-Deux ....................................................... 93
  5.4.6 C1 – Variety of Exercises – Pas de Deux ........................................................................... 93
  5.4.76 C2 – Variety of Positions – Squads and Pas-de-Deux ...................................................... 9493
  5.4.87 C3 – Unity of Composition & Complexity – Individuals, Squads, Pas-de-Deux........ 9694
  5.4.98 C4 – Music Interpretation/Expression/Body Language – Individuals, Squads, Pas-de-deux ................................................................. 9997
  5.4.9 Time limit for the triple exercises .................................................................................. 100
  5.4.10 Deductions from Artistic Score ...................................................................................... 102400

6. **TECHNICAL TEST** .......................................................................................................................... 103102
  6.1 General ..................................................................................................................................... 103102
  6.2 Requirements of the Technical Test ....................................................................................... 103102
  6.3 Scoring of the Technical Test ................................................................................................. 103102
  6.3.1 Technical Exercises ............................................................................................................ 103102
  6.3.2 Performance of additional Exercises .............................................................................. 103402
  6.4 Description of the Technical Exercises and Scoring Criteria ............................................. 104103
  6.4.1 Stand Backward (Balance) .............................................................................................. 104403
  6.4.2 Cartwheel Movement from Neck to Back (Time/Coordination) ..................................... 107406
PREAMBLE

The present Guidelines for Judges are the 11th edition updates, effective 1 January 2024.

All other texts covering the same matter that were issued previously are superseded.

This booklet must be read in conjunction with the FEI Vaulting Rules, the Statutes, the General Regulations ("GRs"), the Veterinary Regulations ("VRs") and any other FEI Rules & Regulations.

In any unforeseen or exceptional circumstances, it is the duty of the Ground Jury to make a decision based on common sense and fair play, thus reflecting as closely as possible the intention of the Rules and of the GRs and any other FEI Rules and Regulations.

For the sake of brevity, this Booklet uses the masculine form; this is to be interpreted to include both genders. Terms with a capitalized first letter are defined in the Vaulting Rules, in the GRs or in the Statutes.

FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

The FEI requires all those involved in international equestrian sport to adhere to the FEI Code of Conduct and to acknowledge and accept that at all times the welfare of the Horse must be paramount. Welfare of the Horse must never be subordinated to competitive or commercial influences. The following points must be particularly adhered to:

1. General Welfare:
   a) Good Horse management
   Stabling and feeding must be compatible with the best Horse management practices. Clean and good-quality forage, feed and water must always be available.
   b) Training methods
   Horses must only undergo training that matches their physical capabilities and level of maturity for their respective disciplines. They must not be subjected to methods which are abusive or cause fear.
   c) Farriery and tack
   Foot care and shoeing must be of a high standard. Tack must be designed and fitted to avoid the risk of pain or injury.
   d) Transport
   During transportation, Horses must be fully protected against injuries and other health risks. Vehicles must be safe, well ventilated, maintained to a high standard, disinfected regularly and driven by competent personnel. Competent handlers must always be available to manage the Horses.
   e) Transit
   All journeys must be planned carefully, and Horses allowed regular rest periods with access to food and water in line with current FEI guidelines.

2. Fitness to compete:
   a) Fitness and competence
   Participation in Competition must be restricted to fit Horses and Athletes of proven competence. Horses must be allowed suitable rest periods between training and competitions; additional rest periods should be allowed following travelling.
   b) Health status
   No Horse deemed unfit to compete may compete or continue to compete, veterinary advice must be sought whenever there is any doubt.
   c) Doping and Medication
   Any action or intent of doping and illicit use of medication constitutes a serious welfare issue and will not be tolerated. After any veterinary treatment, sufficient time must be allowed for full recovery before Competition.
   d) Surgical procedures
   Any surgical procedures that threaten a competing Horse’s welfare or the safety of other Horses and/or Athletes must not be allowed.
   e) Pregnant/recently foaled mares
   Mares must not compete after their fourth month of pregnancy or with foal at foot.
   f) Misuse of aids
Abuse of a Horse using natural riding aids or artificial aids (e.g. whips, spurs, etc.) will not be tolerated.

3. **Events must not prejudice Horse welfare:**
   a) **Competition areas**
   Horses must be trained and compete on suitable and safe surfaces. All obstacles and competition conditions must be designed with the safety of the Horse in mind.
   b) **Ground surfaces**
   All ground surfaces on which Horses walk, train or compete must be designed and maintained to reduce factors that could lead to injury.
   c) **Extreme weather**
   Competitions must not take place in extreme weather conditions that may compromise the welfare or safety of the Horse. Provision must be made for cooling conditions and equipment for Horses after competing.
   d) **Stabling at Events**
   Stables must be safe, hygienic, comfortable, well ventilated and of sufficient size for the type and disposition of the Horse. Washing-down areas and water must always be available.

4. **Humane treatment of Horses:**
   a) **Veterinary treatment**
   Veterinary expertise must always be available at an Event. If a Horse is injured or exhausted during a Competition, the Athlete must stop competing and a veterinary evaluation must be performed.
   b) **Referral centres**
   Wherever necessary, Horses should be collected by ambulance and transported to the nearest relevant treatment centre for further assessment and therapy. Injured Horses must be given full supportive treatment before being transported.
   c) **Competition injuries**
   The incidence of injuries sustained in Competition should be monitored. Ground surface conditions, frequency of Competitions and any other risk factors should be examined carefully to indicate ways to minimise injuries.
   d) **Euthanasia**
   If injuries are sufficiently severe, a Horse may need to be euthanized on humane grounds by a veterinarian as soon as possible, with the sole aim of minimising suffering.
   e) **Retirement**
   Horses must be treated sympathetically and humanely when they retire from Competition.

5. **Education:**
   The FEI urges all those involved in equestrian sport to attain the highest possible levels of education in areas of expertise relevant to the care and management of the Competition Horse.

   The Code of Conduct for the Welfare of the Horse may be modified from time to time and the views of all are welcomed. Particular attention will be paid to new research findings and the FEI encourages further funding and support for welfare studies.

   The English text shall be the authoritative version for legal purposes.
1. OBJECT AND GENERAL PRINCIPLES OF VAULTING

1.1. General

Every test receives four scores with equal value according to the special demands of the test.

**Compulsory Test:**
- Horse Score 25%
- Score for Exercises 75%

**Free Test**
- Horse score 25%
- Technique Score 50%
- Artistic Score 25%

**Technical Test**
- Horse score 25%
- Score for Exercises 50%
- Artistic Score 25%

1.2. Ground Jury

Ground Jury may consist of 2, 4, 6 or 8 judges. (see Vaulting Rules Chapter IV – Officials)

If the Jury consists of 2 judges they must be Level 2 and higher.

At Championships, the Jury must consist of eight Members.

The President of the Ground Jury and/or Technical Delegate is responsible to distribute the judges at CVIs and higher level events based on following rules:

- A judge Level 1 is eligible to judge only Horse Score, Exercise Score (Test 1, 2, 3) and Technique Score (Performance, Degree of Difficulty)
- Each Judge should be assigned evenly to all of the scores during the event, if possible
- In all tests of one competition the judges need to remain the same. (e.g. the same judges judge all Tests in the Female Individual competition)

1.3. Time, Music, Bell

**Horse Score**

The judging begins with the entrance into the arena and ends after the final Landing of the (last) Vaulter on the ground. If more than one Individual Vaulter or Pas-de-Deux enter together to vault on the same Horse, the Entry, Salute and Trot Round (until the bell signal) will be taken into account for all Vaulters on that Horse.

**Compulsory Test**

The time allowed for the Test begins the moment the first Vaulter touches the surcingle, the pad or the Horse and ends with the time limit. An Exercise already in progress at the time limit, when the bell rings, may be finished and will be scored.
Technical Test
The time allowed for the Test begins the moment the Vaulter touches the surcingle, the pad or the Horse. Scoring Technical Exercises ends with the time limit; scoring Performance ends after the final Landing on the ground; scoring Artistic ends with the time limit; except for a dismount that is executed right after the bell, if no further exercise is shown before dismounting: this will be evaluated for the last sequence in T1.
- When the Vaulter loses contact with the Horse, the time and music are stopped (no bell) and resume when the Vaulter touches the handles, pad or Horse again. The test must be continued within 30 seconds.

Free Test
The time allowed for the Test begins the moment the Vaulter touches the surcingle, the pad or the Horse. The judging ends after the final Landing on the ground.
Elements (static and dynamic exercises or transitions) already in progress at the time limit, when the bell rings, may be finished and will be included in all scores.
All following Elements starting after the time limit will be considered in the Performance Score, including deductions for falls, but not in the Degree of Difficulty and the Artistic Score. If dismounts or other exercises are commenced after the bell, there will be a deduction from the Artistic Score.
- In Individual Competition when the Vaulter loses contact with the Horse, the time and music are stopped (no bell) and resume when the Vaulter touches the handles, pad or Horse again. The test must be continued within 30 seconds.
- In Squad and Pas-de-Deux Competition when all Vaulters lose contact with the Horse (the Horse is empty), the time and music are stopped (no bell) and resume when the Vaulter touches the handles, pad or Horse again. The test must be continued within 30 seconds.

All Tests
If a Vaulter is unable to continue immediately after a fall or returns to the line, the judge will ring the bell. The time and music are stopped, and the test is interrupted. The test must be continued within 30 seconds after the signal to resume. The timing resumes, when the Vaulter touches the handles, pad or Horse again. The test must be continued within 30 seconds after the signal to resume.
1.4. **Explanation of the Marks**

The Judges implement the scoring as laid down in these Guidelines and evaluate the shown Tests using the scale of scores described below:

<table>
<thead>
<tr>
<th>Score</th>

</table>
2. HORSE SCORE

2.1. General
Judging of the Horse Score begins with the entrance into the arena and ends when the Vaulter touches the ground after the final dismount.

If more than one Individual Vaulter or Pas-de-Deux enter together to vault on the same Horse, the Entry, Salute and Trot Round (until the bell signal) will be taken into account for all Vaulters on that Horse.

The maximum score is 10 points. The calculated Horse Score will be rounded off to the third decimal (i.e. 0.0011-0.0014 down; 0.0015-0.0019 up).

A1 is the general quality of the gait and training level of the Horse as it is shown in the performance, A2 is the execution of the performance and behaviour of the Horse, and A3 is the quality of the lunging and communication between lunger and Horse including entry, salute, and trot round.

Canter of a Vaulting Horse
The Horse goes forward in a canter with obvious impulsion from the hindquarters to develop the muscles towards the collected canter with an uphill tendency and accurate engagement of the hindquarters.

The Horse goes forward in a canter with energetic strides, clear impulsion from the engaged hindquarters, easy soft connection through the body, supple lifted back, lightness of the forehand, clear uphill tendency with a flexible mobile neck, the nose at or slightly in front of the vertical, and the poll as the highest point.

2.2. Quality of Canter and Throughness (Quality of Training)

Training Scale Guidelines
The training scale is the most important guideline for trainers, riders, lungers and judges.

The training scale is separated into three parts
- Development of understanding and confidence, focusing on rhythm, relaxation and connection;
- Development of pushing power, focusing on relaxation, connection and acceptance of the bit, impulsion and straightness;
- Development of carrying power, focusing on impulsion, straightness and collection.

![Pyramid of Training](image)
2.2.1. RHYTHM (WITH ENERGY AND TEMPO)
Rhythm is the term used for the characteristic sequence of footfalls and timing of a pure walk, pure trot, and pure canter with clear beat and clear moment of suspension (not walk). The rhythm should be expressed with energy and in a suitable and consistent tempo, with the Horse developing the ability to remain in the balance and self-carriage appropriate to its level of training.

Correct footfalls in left canter

2.2.2. RELAXATION (WITH ELASTICITY AND SUPPLENESS)
Relaxation refers to the Horse's mental state (calmness without anxiety or nervousness), as well as to its physical state (the absence of negative muscle tension). Usually the mental and physical states go hand in hand. The Horse learns to accept the influence of the Vaulter/lunger without becoming tense. The Horse acquires positive muscle tone, so that it moves with elasticity, a supple swinging back, and a relaxed neck.

2.2.3. CONNECTION
Connection through the body to the contact on the side reins (acceptance of the bit (or cavesson) through acceptance of the aids) is achieved, when the energy generated in the hindquarters by the driving aids flow through the whole body of the Horse and is received in the side reins and lunge line, referred to as the ‘bridge of engagement’. The contact to the bit or cavesson must be elastic and adjustable. Acceptance of the bridle is identified by the Horse’s quiet chewing. This activates the salivary glands, so that the mouth becomes moist, and production of saliva is often evident. The softly moving tongue should remain under the bit (when a bit is used).

2.2.4. IMPULSION
Impulsion (increased energy and thrust). Impulsion is the term used to describe the transmission of an eager and energetic, yet controlled, propulsive thrust generated from the hindquarters into the athletic movement of the Horse. Impulsion is associated with a phase of suspension. It is measured by the Horse's engagement of its hind legs and desire to carry itself forward with a lowering of the croup, elasticity of its steps, suppleness of its back, and increased lightness of the forehand.

2.2.5. STRAIGHTNESS
Straightness (improved alignment and balance). A Horse is said to be straight, when the footfalls of the forehand and the hindquarters are appropriately aligned on straight and curved lines, and when its longitudinal axis is in line with the track on
which it is lunged. This allows the Horse to load both front legs equally, engage both hind legs evenly, keep the body vertical (no leaning), and prepares the Horse for collection. This process improves the lateral as well as the longitudinal balance of the Horse.

2.2.6. COLLECTION
Collection (increased engagement, lightness of the forehand, self-carriage). The Horse shows collection, when it lowers and engages its hindquarters, and shortens and narrows its base of support, resulting in lightness and mobility of the forehand. Because the centre of mass is shifted backward, the forehand is lightened and elevated; the Horse has "uphill" tendency. The Horse's neck is raised, arched and the whole topline is stretched. The Horse shows shorter, powerful cadenced steps and strides. Elevation must be the result of, and relative to, the lowering of the hindquarters. This is called relative elevation. A training problem is indicated if the Horse raises its neck without displacing its centre of mass to the rear and lowering the hindquarters. This is called absolute elevation and can, if pervasive, adversely affect the Horse's health.

2.3. Vault Ability of the Horse (execution)
The Horse must give the impression of carrying out the Test of its own accord and stay in true balance and self-carriage. There is a picture of harmony and lightness throughout the Test.

2.3.1. Willingness and obedience
The Horse looks comfortable and is working with lightness and harmony and no sign of resistance. The Horse is focused on the lunger's aids, constantly alert to the lungers signals and responding instantly with no hesitation to discrete aids. No adverse reactions or reluctance to perform (e.g. signs of stress, teeth grinding, tail swishing, etc.)

2.3.2. Balance in tempo (forth/back)
The Horse is working with constant pace, tempo and energy without speeding up or slowing down in response to external factors.

Balance in tempo (A2) should be distinguished from Rhythm (A1), e.g. the Horse may show poor rhythm with not always a clear 3-beat canter (lower A1), but may still work with completely consistent speed and energy (higher A2). Or it may show an excellent rhythm with clear 3-beat canter and clear moment of suspension (higher A1), but the speed changes repeatedly throughout the performance in response to exercises (lower A2).

2.3.3. Balance in circling (in/out)
The Horse is working on a constant circle of min. 15 m. diameter without falling in or out of the circle.

2.4. Lunging criteria
The lunging should reflect an easy and effortless collaboration and communication between the lunger and the Horse.

2.4.1. Lunger's Position
The lunger should be in an upright position with good posture, straight back, relaxed shoulders and head upright facing the Horse. Both arms should be relaxed, in front of the lunger, softly bent at the elbows, and with the hands held at a level below the lunger's shoulders and above the waist. Hands and wrists should be without tension.
The lunger should stand in the centre of the circle and rotate around the left foot when the Horse is cantering to the left, the right foot when the Horse is cantering to the right. Though not ideal, it is acceptable for the lunger to walk in a very small circle concentric to that of the Horse. However this may affect the score for lunging.

The lunger stands at the top of a triangle and the front and back of the Horse form the base. The lunger should be facing towards the Horse's middle. They are connected by the lunge line to the front and by the whip to the rear.

If the circle line or the engagement or speed of the Horse needs to be corrected, the lunger may change position accordingly and may move the whip from the shown position. However this may affect the score for lunging.

2.4.2. Lunging Aids

All vaulting aids should be applied correctly and discretely.

Lunge Line

The lunge line takes the place of the rider's rein aids. It may be held with the line running to the Horse held between the fourth and fifth finger (as a rider) or between the thumb and second finger (as a driver). The lunger's elbow should be softly bent.

Like rein aids while riding, signals should be given smoothly and as softly as possible to get the desired response. The aids should be given by squeezing or turning the hand (half-halts) - not pulling or hanging on the lunge line.

Lunge Whip

The lunge whip takes the place of the rider's legs. When the whip is not used for the purpose of giving the necessary aids, it should be held at an angle of about 45 degrees or higher, pointing towards the Horse's croup. The Horse should accept the whip as an aid without showing fearful reactions, while remaining alert and responsive to the aids. The Horse must be encouraged to have freedom of forward movement. The whip should not be used to drive the Horse forward continuously, as aids are intended for changing the way of going and should not constantly impact the Horse.

If the lunger goes toward the Horse to adjust equipment, the lash should be gathered, and the whip turned backward, so that it does not interfere with the Horse.

Lunger’s Voice

The voice is mainly used for transitions, praise, to call the Horse's attention, and/or to express mild corrections disagreement. The voice is an important aid in lunging and should be used (as described above) to change the way of going without constantly impacting the Horse.

2.4.3. Side Reins

With the side reins properly adjusted, the Horse can carry its nose correctly on or slightly in front of the vertical.

2.4.4. Presentation and Equipment

The Horse must be turned out for athletic competition with correctly adjusted bridle and correct position of surcingle and padding/pad. All straps are attached or hidden. All other equipment (boots, bandages, etc.) must be properly fitted. Excessive decorations distracting from the performance are discouraged.

Lunger should be appropriately dressed. Suitable footwear must be worn. Gloves are allowed. Excessive decorations distracting from the performance are discouraged. Props, hats, etc. are not allowed.

2.5. Entry, Salute, and Trot Round

The entry, salute and trot round should be performed in a smooth flow from entering the arena till striding off into canter and approach by Vaulter. Interruptions in flow or undue delay will incur a deduction - see below.
Entry
For correct entry, the lunger should lead the Horse into the arena in trot on a straight line towards judge at A (if the arena permits). The Horse should move willingly in a controlled manner with the lunger at the level of the Horse’s left shoulder. The lunge may be held in either or both hands. A correct halt directly from trot is shown at or near the centre of the circle.

Salute
For correct salute, the Horse should show good behaviour, stand quietly and straight in relation to judge at A from the halt during the salute. The Horse must stand square. The lunger and Vaulters salute judge at A, who returns the salute. The salute should be performed within the first 30 sec.

Assessment of trot (trot round)

2.5.2. Trot Round
While the Vaulter(s) leave the centre of the circle, the lunger should direct the Horse to move straight onto the line of the circle with a tight and untwisted lunge line. They may lead the Horse onto the circle, however this will earn a lower score. It is allowed to lead the Horse onto the circle, however this will earn a lower score. The circle should be no smaller than 15 m. in diameter. With no undue delay upon reaching the 15 m. circle, at the aids of the lunger the Horse should move into working trot, and the Horse must trot on the circle until judge at A signals with the bell. After the bell and with no undue delay, at the aids of the lunger the Horse should make a smooth transition into canter. Before the canter transition, a short halt or walk strides are allowed.

At the aids of the lunger, the Horse must show a minimum of a quarter round of working trot with a clear two-beat trot rhythm, to be assessed by the Judges. It is permitted for the Horse to halt, walk, and/or canter before showing the trot round. The Judge at A signals to the Lunger when the Horse is assessed fit to compete.

After the bell, at the aids of the lunger the Horse should make a smooth transition into canter. Before the canter transition, a short halt or walk strides are allowed. At the latest 30 sec after the bell, the first exercise must be commenced. Within the 30 sec, adjustment of equipment (e.g. length of side reins) is allowed.

The Horse is scored during the entry, salute and assessment of the trot.

If the performance has not commenced at the time limit, Judge at A may ask the lunger to start.

2.6. Score for the Horse
For A1, six scores are given between 0-10, one decimal is allowed, and the average of the six scores counts as A1. For A2 and A3, one score is given between 0-10 for each, one decimal is allowed.

### Vault Ability of the Horse
- Willingness and obedience: **Comfortable, Harmony and lightness. Alert and responsive to the lunger’s aids.** - No resistance or hesitation. Alert and responsive to the lunger’s aids. Harmony and lightness.
- Balance in tempo (forth/back): Constant correct **tempo** (pace, tempo, and energy without speeding up or slowing down).
- Balance in circling (in/out): Constant circle of min. 15 m. diameter without falling in or out.

<table>

Deductions: see listed below

### Lunging
- The lunging should reflect an easy and effortless collaboration and communication between the lunger and the Horse. Correct and discrete use of aids. Correct position and posture. Appropriate dress. Well-adjusted equipment.
- Entry, salute, and trot round: Should be performed in a smooth flow from entering the arena, till striding off into canter and till the Vaulter touches the Horse.

Deductions: see listed below
### 2.6.1. Quality of Canter and Throughness (Quality of training) (Score A1)

#### Reference Score - Basic Scores for A1

<table>
<thead>
<tr>
<th>Reference Basic Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points**   | Rhythm absolutely regular and expressed with energy. Length of strides equal throughout the performance. Always clear 3 beat canter with clear moment of suspension. | • True rhythm of gait  
• Clear moment of suspension  
• Rhythm expressed with energy  
• Equal stride lengths  
• Footfalls always correct  
• Tempo suitable and regular  
• Hind legs active  
• Horse in balance |
| **Up to 8 Points**    | Rhythm regular, expressed with moderate energy. Length of strides mostly equal throughout performance. 3 beat canter with recognizable moment of suspension. | • Mostly true rhythm of gait  
• Suspension evident  
• Rhythm expressed with moderate energy  
• Footfalls mostly correct  
• Tempo mostly suitable and regular  
• Hind legs mostly active  
• Horse appears in balance |
| **Up to 6 Points**    | Rhythm mostly regular but lacking energy or rushing slightly. Length of strides somewhat variable throughout the performance. 3 beat canter not always clear, and moment of suspension no longer evident. | • Changes in rhythm of gait  
• Not always clear 3 beat canter  
• Lacking energy or rushing slightly  
• Slight interruption of correct footfalls  
• Tempo varies  
• Hind legs lacking activity causing rhythm faults  
• Horse mostly in balance |
| **Up to 4 Points**    | Rhythm mostly irregular and/or lacking energy (appears to be 4-beat canter) and/or rushing. Length of strides vary throughout the performance. Moment of suspension not evident or very inconsistent. | • Rhythm of gait not clear  
• Appears 4 beat for most of performance  
• Rhythm lacking energy or rushing  
• Interruption of correct footfalls  
• Tempo varies  
• Hind legs lacking activity causing severe rhythm faults  
• Horse rarely in balance |
| **Up to 2 Points**    | Rhythm irregular (appears to be 4-beat canter) throughout the performance, length of stride is unclear throughout the performance. | • Rhythm of gait unclear  
• Appears 4 beat throughout performance  
• Correct footfalls not evident  
• Lack of energy  
• Hind legs severely lacking activity causing severe rhythm faults  
• Horse not in true balance |
### Reference Basic Score – Relaxation

<table>
<thead>
<tr>
<th>Reference Basic Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points**   | Completely relaxed and supple Horse throughout the performance. Horse works with positive muscle tone. No signs of tension or stress. | • Completely relaxed expression  
 • Good elasticity of steps  
 • Freedom from anxiety  
 • Positive muscle tone  
 • Swinging back with true bridge of engagement evident  
 • Tail carried in a relaxed manner  
 • Rhythmical breathing  
 • Physical and mental relaxation shown throughout |
| **Up to 8 Points**     | Relaxed and supple Horse throughout most of the performance. Mostly no tension or stress through the body. Mostly swinging back and relaxed neck. | • Relaxed expression  
 • Elasticity of steps  
 • Freedom from anxiety  
 • Relaxed neck  
 • Swinging back  
 • Tail carried mostly in a relaxed manner  
 • Mostly rhythmical breathing  
 • Physical and mental relaxation shown throughout most of the performance |
| **Up to 6 Points**     | Relaxation and suppleness not shown throughout performance. Signs of lack of suppleness. Some tightness in back and neck. | • Expression showing some anxiety and tension  
 • Some tension in neck carriage  
 • Some tightness in back  
 • Some agitated tail carriage |
| **Up to 4 Points**     | Relaxation and suppleness not shown throughout performance. Many signs of lack of suppleness. | • Expression showing anxiety and tension most of the time  
 • Clear tension in neck carriage.  
 • Clear tightness in back and/or hollow back  
 • Clear agitated tail carriage |
| **Up to 2 Points**     | Relaxation and suppleness not shown. Very tense. | • Expression showing anxiety and tension throughout.  
 • Severe tension through the neck.  
 • Severe tightness in back (completely hollow)  
 • Very agitated tail carriage |
<table>
<thead>
<tr>
<th>Reference Base Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points** | Clear bridge of engagement. The energy generated in the hindquarters by the driving aids flow through the whole body of the Horse and is received in the side reins and on the lunge line for the entire performance. | • Clear connection through bridge of engagement (flexed)  
• Soft mouth  
• Horse nose line at vertical or slightly in front of vertical  
• Side reins showing soft connection  
• Lunge line contact soft and adjustable in constant contact with lunger |
| **Up to 8 Points** | Minor losses of bridge of engagement. The energy generated in the hindquarters by the driving aids flow through the whole body of the Horse and is received in the side reins and on the lunge line for most of the performance. | • Connection through bridge of engagement mostly shown (flexed)  
• Soft mouth  
• Horse nose line mostly at vertical, can be slightly in front or behind vertical. _only briefly_  
• Side reins mostly showing connection  
• Lunge line contact soft and adjustable mostly in contact with lunger |
| **Up to 6 Points** | The energy is not always generated by the hindquarters through the whole body of the Horse. Contact to side reins and lunge line is not always evident (moments of Horse evading contact by shortening the neck or placing nose above or behind vertical). | • Connection is not always shown through bridge of engagement (hollow)  
• Mouth dry and open, moments of tongue out showing tension, but not over the bit.  
• Horse nose line fluctuates _momentarily_ in front and/or behind vertical  
• Side reins mostly showing stiffness or no connection  
• Lunge line: contact not always established, loose, or bracing lunge line |
| **Up to 4 Points** | The energy is not generated by the hindquarters through the whole body of the Horse. Contact to side reins and lunge line is not evident through most of the performance (Horse clearly evades contact by shortening the neck or placing nose above or behind vertical). | • Connection is not shown through bridge of engagement (very hollow)  
• Mouth open and/or bracing on side reins.  
• Tongue out and showing tension for most of performance, or tongue over the bit.  
• Nose _line mostly clearly well_ in front of _vertical nose line_. (No connection or bridge)  
• Nose _mostly clearly_ behind vertical with side reins tight or with no contact  
• Lunge line: no contact, constantly looped, or braced |
| **Up to 2 Points** | The energy is not generated by the hindquarters through the whole body of the Horse. Contact to side reins and lunge line is not evident. Horse is not on the bit at any time. | • Connection is not shown through bridge of engagement (very hollow)  
• Mouth open and/or bracing on side reins.  
• Tongue out and showing tension throughout performance  
• Nose well in front of nose line (no connection or bridge)  
• Nose well behind vertical with side reins tight or with no contact  
• Lunge line: no contact, constantly looped, or braced |
### Reference Basic Score - Impulsion

<table>
<thead>
<tr>
<th>Reference Base Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points**  | The Horse shows a desire to carry himself forward, with elastic steps, suppleness of the back (swing), and engagement of the hindquarters. Energy created by the hindquarters with the hind legs coming well underneath the Horse's centre of gravity, creating a lifting of the forehand (Uphill tendency) throughout the whole performance. Croup low. | • Energy through from behind  
• Hind legs ‘carrying’ and coming underneath the Horse’s centre of gravity  
• Horse has elastic steps  
• Croup low  
• Horse keeps the same eagerness and energy throughout the performance. |
| **Up to 8 Points**    | The Horse shows a desire to carry himself forward, with elastic steps, suppleness of the back (swing), and engagement of the hindquarters. Energy created by the hindquarters with the hind legs coming well underneath the Horse’s centre of gravity, creating a lifting of the forehand (Uphill tendency) throughout most of the performance. | • Energy mostly through from behind  
• Hind legs mostly ‘carrying’ coming underneath the Horse’s centre of gravity  
• Horse keeps the same eagerness and energy throughout most of the performance. |
| **Up to 6 Points**    | The Horse does not always show a desire to carry himself forward, and not always with elastic steps. Mostly lacking energy, having to be driven by the lunger, or mostly running on the forehand. Horse rushing rather than engaged from behind. Suppleness of the back (swing) is not always visible, and the hind legs are not coming under the Horse’s centre of gravity, but more ‘pushing’ the hindquarters up (croup high) rather than ‘carrying’ (croup low). | • Energy is not always shown  
• Hind legs mostly ‘pushing’ as opposed to ‘carrying’ (croup high).  
• Horse does not show elastic steps  
• Horse shows lack of energy or lack of eagerness to carry himself forward (stalling)  
• Horse mostly runs on the forehand  
• Horse rushing |
| **Up to 4 Points**    | The Horse does not show a desire to carry himself forward, with a stiffness in the steps, the back shows no suppleness (swing). Clearly lacking energy, having to be driven constantly by the lunger, or clearly running on the forehand. | • Energy is mostly not shown  
• Horse shows clear lack of energy and desire  
• Horse appears to be struggling  
• Horse clearly runs on the forehand  
• Horse running |
| **Up to 2 Points**    | The Horse shows absolutely no desire to carry himself forward, with a stiffness in the steps, the back shows no suppleness (swing) the hind legs are not coming under the Horse’s centre of gravity. No energy, having to be constantly driven by the lunger, or constantly running on the forehand. | • Energy is not shown  
• Hind legs are lagging  
• Little or no elasticity  
• Horse is struggling in the gait |
### Reference Basic Score - Straightness

<table>
<thead>
<tr>
<th>Reference Basic Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points**   | The Horse has ‘relative’ straightness on the circle line. The hind legs follow in the footsteps of the front legs. The Horse is aligned through its whole body on the line of travel. Body vertical. | • Straight through body  
• Hind legs following the footsteps of the front legs  
• Horse in balance equally on both side of its body  
• Equal weight distribution over all legs  
• Body almost vertical |
| **Up to 8 Points**    | The Horse mostly has ‘relative’ straightness on the circle line. The hind legs follow in the footsteps of the front legs. The Horse is mostly aligned through its whole body on the line of travel. Body close to almost vertical. | • Mostly straight through body  
• Hind legs following the footsteps of the front legs with minimal deviation  
• Horse mostly in balance equally on both side of its body  
• Mostly equal weight distribution over all legs (slight leaning is acceptable), head not or slightly tilted  
• Body leaning slightly to inside |
| **Up to 6 Points**    | The Horse’s ‘relative’ straightness on the circle line is not always evident. The hind legs deviate from the footsteps of the front legs for parts of the performance. The Horse is not always aligned through its whole body on the line of travel. Body not always vertical, but showing some leaning in. | • Not always straight through body  
• Hind legs deviate from footsteps of the front legs  
• Haunches/quarters out or haunches/quarters in  
• Body moderate leaning in  
• Head moderately crooked/tilted |
| **Up to 4 Points**    | The Horse’s ‘relative’ straightness on the circle line is not evident. The hind legs deviate from the footsteps of the front legs for most of the performance. The Horse is rarely aligned through its whole body on the line of travel. Body clearly leaning in. | • Not straight through body  
• Hind legs mostly deviate from footsteps of the front legs  
• Haunches/quarters out or haunches/quarters in for most of the performance  
• Body clearly leaning in  
• Head clearly crooked/tilted  
• Clear changes of line of travel |
| **Up to 2 Points**    | The Horse’s ‘relative’ straightness on the circle line is not evident. The hind legs deviate from the footsteps of the front legs throughout the entire performance. The Horse is not aligned through its whole body on the line of travel. Body not vertical. | • Not straight through body  
• Hind legs deviate from footsteps of the front legs  
• Haunches/quarters out or haunches/quarters in for the entire performance.  
• Severe leaning in  
• Head very crooked/tilted  
• Severe changes of line of travel |
### Reference Basic Score - Collection

<table>
<thead>
<tr>
<th>Reference Basic Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points**   | The Horse shows collection by lowering and engaging its hindquarters, and shortening and narrowing its base of support, resulting in lightness and mobility of the forehand. Because the centre of mass is shifted backward, the forehand is lightened and elevated; the Horse feels more “uphill.” The Horse’s neck is raised and arched, and the whole top line is stretched. Shorter and powerful steps and strides. Elevation must be the result of, and relative to, the lowering of the hindquarters. This is called relative elevation. | • Clear uphill  
• Hind legs carrying (not pushing)  
• Narrow base of support  
• Poll at the highest point  
• Top line stretched  
• Lightness of gait and forehand mobile |
| **Up to 8 Points**     | The Horse shows increased collection by lowering and engaging its hindquarters, and some shortening and narrowing of its base of support, resulting in some lightness and mobility of the forehand. Because the centre of mass is starting to shift backward, the forehand becomes lighter and more elevated; the Horse feels more “uphill.” The Horse’s neck is starting to raise and become more arched, and the top line is becoming longer. Shorter steps and strides. In developing collection the Horse’s poll is not always at the highest point. | • Mostly uphill  
• Hind legs carrying (not pushing)  
• Narrowing base of support  
• Poll at the highest point for most of performance  
• Horse clearly developing collection  
• Top line stretching  
• Forehand shows increasing lightness |
| **Up to 6 Points**     | The Horse is starting to develop collection. Lacking some engagement over the back. The hind legs not always carrying. The Horse does not always appear uphill. The poll fluctuates between high and low as Horse tries to balance while developing collection. Strides are shortened through tension or slower pace rather than collection. | • Not always uphill  
• Hind legs trailing at times (not always carrying)  
• Base of support is not narrow  
• Poll position fluctuates for parts of performance  
• Horse is starting to show collection  
• Top line not always stretched  
• Forehand shows moderate lightness |
| **Up to 4 Points**     | The Horse shows little collection. Pace slow and inactive, or running clearly on forehand. Lacking engagement over the back (stiff or hollow). The hind legs trail rather than carry. The Horse does not appear uphill. The poll may be the highest point, but not through the bridge of engagement. | • Downhill tendency  
• Hind legs trailing (not carrying)  
• Base of support is wide  
• Poll position fluctuates for most of performance  
• Horse is barely starting to develop collection  
• Top line not stretched  
• Forehand shows minimal lightness |
| **Up to 2 Points**     | The Horse shows no collection. Pace slow and restricted, or running on forehand. Lacking engagement over the back. The hind legs trail and do not carry. The Horse does not appear uphill. The poll may be the highest point, but not through the body, and/or the poll is low. The Horse is on the forehand, no lightness of gait. | • Downhill  
• Hind legs trailing (not carrying)  
• Pace slow, lacking energy  
• Base of support is wide  
• Poll position fluctuates for most of performance  
• Horse shows no collection  
• Top line not stretched over bridge of engagement  
• On the forehand, shows no lightness |

#### 2.6.3. Vault Ability of the Horse (execution) (Score A2)

The score for Vault Ability includes attention and confidence, harmony, lightness and ease of movement, and acceptance of aids. The Horse must give the impression of being comfortable and carrying out the Test of its own accord, and stay in true balance and self-carriage.
Putting the tongue out (clearly visible) with open mouth and hard contact on side reins/lunge line, keeping it above the bit or drawing it up altogether, grinding the teeth, ears pinned back, or agitation of the tail, are all signs of nervousness, stress or resistance on the part of the Horse and must be taken into account. The Horse softly chewing or licking its mouth is not a sign of tongue tension.

### Basic Scores for A2

<table>
<thead>
<tr>
<th>Basic Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 10 Points</td>
<td>The Horse is absolutely willing and gives the impression of carrying out the Test of its own accord and stays in true balance and self-carriage. There is a picture of harmony and lightness throughout the Test.</td>
<td><strong>Willingness and obedience</strong> Absolute willingness to perform the Test in harmony with the lunger. <strong>Balance in tempo</strong> Absolutely regular pace and energy throughout the entire Test. <strong>Balance in circling</strong> Absolute constant circle of not less than 15 m diameter.</td>
</tr>
<tr>
<td>Up to 8 Points</td>
<td>The lunger is able to direct a mostly willing and obedient Horse through the Test without clear sign of resistance or hesitation. Most of the time the Horse is alert and responsive to the lunger’s discrete aids and stays in balance and self-carriage. Good harmony and ease of movement.</td>
<td><strong>Willingness and obedience</strong> Without resistance or hesitation. <strong>Balance in tempo</strong> Regular pace and energy throughout the entire Test. <strong>Balance in circling</strong> Most of the time a constant circle of not less than 15 m diameter.</td>
</tr>
<tr>
<td>Up to 6 Points</td>
<td>The Horse goes through the Test more or less willing and obediently, but gives the impression of moments of tension, stress, or resistance. Loss of lightness and harmony. The Horse is not always responsive to the lunger’s aids and not always in balance and self-carriage.</td>
<td><strong>Willingness and obedience</strong> There is some resistance or hesitation. <strong>Balance in tempo</strong> Some changes in pace and energy. <strong>Balance in circling</strong> The diameter of the circle changes, but most of the time it is not less than 15 m in diameter.</td>
</tr>
<tr>
<td>Up to 4 Points</td>
<td>The Horse is clearly unwilling, disobedient or uneducated. It does not always accept the aids of the lunger or lacks confidence and understanding of the given aids.</td>
<td><strong>Willingness and obedience</strong> Several moments of resistance. <strong>Balance in tempo</strong> Several changes in pace and energy. <strong>Balance in circling</strong> Most of the time, the diameter of the circle is 15 m in diameter or less.</td>
</tr>
<tr>
<td>Up to 2 Points</td>
<td>The Horse is very unwilling, disobedient or uneducated. It does not accept the aids of the lunger throughout the entire Test.</td>
<td><strong>Willingness and obedience</strong> Very disobedient with clear resistance. Out of the lunger’s control. <strong>Balance in tempo</strong> Pace and tempo is constantly changing. <strong>Balance in circling</strong> All of the time, the diameter of the circle is 15 m in diameter or less, or the Horse is constantly moving in and out of the circle.</td>
</tr>

</tbody>
</table>

A deduction is given each time an error occurs in the Test. If a deduction is given, it should be mentioned on the score sheet. The same penalty may be given several times. If multiple errors occur in one incidence (e.g. bucking followed by trot steps before transition back into canter) then they will be scored as one deduction.
### 2.6.4. Lunging (Score A3)

#### Reference Basic Scores for A3

<table>
<thead>
<tr>
<th>Reference Basic Score</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 10</td>
<td>Correct and discrete aids, appropriate discrete use of the whip. Lunge line is straight demonstrating contact (the lunge may sag a bit according to the weight of the lunge line). Stationary lunger, very good posture, appropriate dress.</td>
</tr>
<tr>
<td>Up to 8</td>
<td>Correct aids, but clearly visible. Appropriate but less discrete use of the whip. Lunge line is not always straight demonstrating contact (the lunge may sag a bit according to the weight of the lunge line). Lunger moves in a very small circle during part of the performance (approx. 1 m diameter). Good posture, appropriate dress.</td>
</tr>
<tr>
<td>Up to 6</td>
<td>Not always correct aids, or aids not always effective. Marked use of the whip. Lunge line is often loose and/or twisted. Lunger moves in a small circle during most of the performance (approx. 1-2 m diameter). Posture not always correct.</td>
</tr>
<tr>
<td>Up to 4</td>
<td>Lunger disturbs the Horse. Constant use of the whip/aids, or whip/aids not used when necessary (passive). Lunge line is always loose or very hard contact. Lunger moves in a circle more than 3 m in diameter during most of the performance.</td>
</tr>
<tr>
<td>Up to 2</td>
<td>Result of several faults.</td>
</tr>
</tbody>
</table>

#### Deductions for A3 (regarding Entry, Salute and Trot Round)

<table>
<thead>
<tr>
<th>Deduction</th>
<th>Deduction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minor interruption (minor disobedience/reaction from the Horse, salute not centred, Horse not standing straight/still, etc.)</td>
<td>0.1-0.2 points</td>
</tr>
<tr>
<td>Medium interruption (medium disobedience/reaction from the Horse, circle not entered in trot, lunge line and equipment not tidy, inappropriate use of aids, Horse canters &lt;1 round before or during trot round, etc.)</td>
<td>0.2-0.5 points</td>
</tr>
<tr>
<td>Major interruption (major disobedience/reaction from the Horse, Horse stopping, Horse running, trot round clearly too small or not even, etc.)</td>
<td>0.5-1 points</td>
</tr>
<tr>
<td>The lunger uses excessive time after the salute before showing the trot round (slow to reach the circle, slow to transition to trot, canters &gt;1 round before or during trot, etc.)</td>
<td>1 point</td>
</tr>
<tr>
<td>The lunger leads the Horse onto the circle after the salute</td>
<td></td>
</tr>
<tr>
<td>The lunger does half a circle or moves around the arena before he/she and the Horse arrive at the centre of the circle</td>
<td></td>
</tr>
</tbody>
</table>

A deduction is given each time an error occurs in the Test. If a deduction is given, it should be mentioned on the score sheet. The same penalty may be given several times. If multiple errors occur in one incidence (e.g. Horse bucking in trot round followed by several canter strides before transition back into trot) then they will be scored as one deduction.
3. SCORING EXERCISES

3.1. Types of Elements in Vaulting

Static exercise:
- A significant part of the body mass doesn't move/is not displaced relatively to the Horse.
- The CoG should have nearly the same distance to the ground, because parts of the body absorb the up and down movement of the Horse.
- The exercise is held for at least one complete canter stride in Compulsory Test and in the Technical Exercises, and for the defined number of strides in Free Test and the Additional Exercises in Technical Test.
  - Compulsory exercises are to be held for four canter strides.
  - Technical Test exercises are to be held for three canter strides.
  - Free Test exercises are to be held for three canter strides.
  - Additional exercises in Technical Test are to be held for three canter strides.

Dynamic exercise:
- A significant part of the body mass (vast majority of points of mass) is in motion/moves along an identifiable trajectory (motion path).
- The movement is intentional and controlled

Transition:
- Element that is not counted for DoD in Free Test or as Additional exercise in Technical Test, but for Performance and Artistic (except for C1).

3.2. Glossary of the Biomechanical Terms

Planes Horse's body

Planes Human's body
Physiological posture:

Posture means the position of the body in space and has the purpose of maintaining the body in balance and under control during static as well as dynamic movements/exercises.

It is maintained through the contraction of muscles and through continuous adjustment of neuromuscular type.

In the physiological posture of the upper body, the spinal column is stretched upwards from the base of the sacrum, on the sagittal plane, with three physiological curvatures which are formed along the line of the center of gravity.

3.3. Scoring of the exercises

3.3.1. General Criteria

All vaulting exercises can be assessed using the five general criteria below:

- Harmony with the Horse
- Body Control & Posture
- Quality of Movement
- Balance
- Flexibility

Each criterion and its requirements are described in the tables under the point 3.4.3. "Reference Scores and General Deductions".

3.3.2. Essence of an exercise

The Essence of an exercise is explained by 2 to 3 of the above mentioned general criteria.

For Compulsory and Technical exercises, these general criteria are listed at the top of their description in the corresponding section of these Guidelines.

For Free Test exercises, the general criteria vary depending on the structure group that the exercise belongs to. Free Test exercises are exercises that comply with the definition in point 3.1. "Types of Elements in Vaulting" and are not listed as
Compulsory or Technical Exercises in the Guidelines. The description and categorization of the Free Test Exercises are laid down in the Code of Points.

“Harmony with the Horse” is the most important criterion for all exercises.

### 3.3.3. Reference Scores and General Deductions (set-up of the scores)

**For Technical exercise Cartwheel movement from neck to back** refer to the specific Reference scores and deviations related to the exercise (see Technical Test sections of these Guidelines).

Cases not covered by these specific descriptions, can be dealt with according to the tables with the description of each General Criteria below (Harmony with the Horse, Body Control & Posture, Quality of Movement, Balance, Flexibility).

**Reference score scoring rules:**
- The Reference score is set between the score for the chosen box and the score for the next lower box; **decimals can be used within this range**
- Once the Reference score is chosen, **specific deductions apply** (e.g. missing canter stride...).
- Furthermore, **additional deduction** for deviations not linked to the essence apply, for a total amount of **maximum 1 point** (e.g. arm not stretched in flag or basic seat, bent knee in mill, loose toes in swinging exercises...).

For **Free Test** exercises refer to the tables below: the judges focus on the Essence of each exercise, and refer to the tables for 2 to 3 General Criteria that reflect the Essence.

For all exercises, additional deductions can be applied for deviations that are not related to the Essence of the exercise (maximum 1.0 point in total).

**Examples:**

**a. A minor deviation linked to the Essence** of the exercise would entail a Reference Score of 8, which means a Deduction of 2 (out of 10) for its Performance.

**b. Additional deviations that are not linked to the Essence**, will increase the Deduction to be recorded for the exercise, by maximum 1 point (all together for each exercise).

An exercise with a minor deviation linked to the Essence (a.) + additional deviations (b.), may receive a Deduction of $2 + 1 = 3$ for its Performance.

**Example - Sideways stand:** the Essence is Harmony with the Horse, Balance and Body Control / Posture: the Vaulter shows slight tension in upper body and/or legs during static phase and a minor lack of absorption during build up or build down -> Reference score 8.0 or Deduction 2; furthermore the arms are too low -> additional Deduction from Reference Score 0.3 => Score 7.7 or Deduction of 2 to 3.

**Example - Backward roll from neck to back:** the Essence is Quality of Movement and Balance: the Vaulter lands on their flat back (major deviation from optimal mechanics) -> Reference score 4 or Deduction of 6; furthermore the legs are fairly bent -> additional Deduction from Reference score 0.6 => Score 3.4 or Deduction between 6 and 7.

**Note:** For Compulsory and Technical Exercises Deductions can be expressed in decimals; in Free Test and Additional Exercises in Technical Test, deductions are recorded in tenths.

**Legend:**

- ✔ Requirements: must be fulfilled to obtain the corresponding Reference score
- ➖ Deviations: these deviations are already accounted for in the corresponding Reference score. The score is the same if the Vaulter shows one or more deviations listed for that score
- ✤ Notes: describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions).
### 3.3.4. Harmony with the Horse

**Description**
Establishing a smooth and harmonious connection with the horse and minimizing the forces exerted on the Horse by anticipating, absorbing the movement of the Horse and accelerating/decelerating smoothly and in rhythm with the horses movement at all times.

Consideration of the Horse by adapting the technique and mechanics of an exercise to the build and training level of the Horse, to ensure the Horse is able to carry the exercise, without its comfort and balance being disturbed.

(Rhythmic Ability, Reaction Ability, Adaptation Ability)

<table>
<thead>
<tr>
<th>Indicators</th>
<th>Size of supporting area, distribution of weight over the entire supporting area, landing on and pushing off the Horse, acceleration and slowing down of body weight, use of Horse’s movement.</th>
</tr>
</thead>
</table>
| ✔ | Uses the maximum required supporting area AND weight evenly spread
| ✔ | Completely smooth and harmonious connection with the Horse, by absorbing the movement of the Horse
| ✔ | In rhythm at all times
| ✔ | Acceleration and Pushing Off: exerting no more pressure than necessary for excellent mechanics
| ✔ | Landing and Slowing Down: completely soft and harmonious |

| Ref. Score | 10 |
| Or Deduction | 0 |
| Minor Deviations: | In rhythm at all times
| Uses nearly the maximum supporting area AND weight almost evenly spread
| Smooth connection with the Horse, by absorbing the movement of the Horse almost completely
| Acceleration and Pushing Off: putting slightly more pressure on the Horse than necessary
| Landing and Slowing Down: not completely soft and harmonious |

| Ref. Score | 8.0 |
| Or Deduction | 2 |
| Medium Deviations: | Does not use the maximum supporting area most of the time AND sometimes unsteady
| Occasionally not absorbing the movement of the Horse.
| Sometimes out of rhythm
| Acceleration and Pushing Off: exerting abrupt pressure on the Horse (caused by pushing or pulling)
| Landing and Slowing Down: fairly hard |

| Ref. Score | 6.0 |
| Or Deduction | 4 |
| Major Deviations: | Severe collapse on the Horse
| Significant disturbance of the comfort or balance of the Horse
| Considerable changes of size/shape/place of the supporting area throughout
| Very unsteady during the whole exercise
| Very little connection with the Horse and very poor absorption throughout.
| Completely out of rhythm throughout
| Landing and Slowing Down: very hard |

### 3.3.5. Body Control & Posture

**Description**
Coordination of action of muscles, maintaining a physiological posture and body control throughout the exercise. Ability to achieve active postural adjustments to perform a specific movement or position.

(Body Orientation, Coupling Ability, Strength)

<table>
<thead>
<tr>
<th>Indicators</th>
<th>Symmetry, body alignment, body stability, body tension</th>
</tr>
</thead>
</table>
| ✔ | Physiological posture and required body alignment: Correct
| ✔ | Required Position: Correct
| ✔ | Excellent body tension precisely measured to control the posture and position, without any additional unnecessary tension |

| Ref. Score | 10 |
| Or Deduction | 0 |
3.3.6. Quality of Movement

**Description**
Execution of movement with correct mechanics, trajectory and scope, in a controlled, fluid motion, with precision and accuracy.

(Spatial Awareness, Kinesthetic Ability, Strength, Mobility)

**Indicators**
Trajectory (motion path), sequence, fluidity and timing of movement.

<table>
<thead>
<tr>
<th>Ref. Score Or Deduction</th>
<th>Major Deviations:</th>
</tr>
</thead>
</table>
| 10                     | ✔ Mechanics:correct  
                         | ✔ Timing:correct  
                         | ✔ Excellent fluidity  
                         | ✔ Trajectory (motion path) of the body:correct |
| 8.0                    | Minor Deviations:  
                         | ✔ Mechanics:minor deviation (e.g. minor lack of scope)  
                         | ✔ Timing:parts of the movement slightly delayed or ahead  
                         | ✔ Minor lack of fluidity  
                         | ✔ Trajectory (motion path) of the body: very close to being correct |
| 6.0                    | Medium Deviations: 
                         | ✔ Mechanics:medium deviations  
                         | ✔ Timing:parts of the movement delayed or ahead  
                         | ✔ Medium interruption of fluidity  
                         | ✔ Trajectory (motion path) of the body:medium deviations |
| 4.0                    | Major Deviations: 
                         | ✔ Mechanics:major deviations  
                         | ✔ Timing:several significant deviations in timing  
                         | ✔ Signification interruption of fluidity  
                         | ✔ Trajectory (motion path) of the body: major deviations |

3.3.7. Balance

**Description**
Keeping the entire body in equilibrium and/or restore this state, during a static or dynamic element.

(Balance Ability, Rhythm, Movement Anticipation)

**Indicators**
Relation between CoG and supporting area, placement/changes of supporting area, Stability of CoG

<table>
<thead>
<tr>
<th>Ref. Score Or Deduction</th>
<th>Major Deviations:</th>
</tr>
</thead>
</table>
| 10                     | ✔ CoG: stable above the supporting area throughout  
                         | ✔ Supporting area: unchanged throughout |
| 8.0                    | Minor Deviations: 
                         | ✔ Supporting area: unchanged throughout  
                         | ✔ CoG: slightly unstable during a short moment , but remaining above the supporting area |
### 3.3.8. Flexibility

**Description**
Combines the passive flexibility of joints and muscles, and the active flexibility needed to hold the position for a certain amount of time (Flexibility, Strength)

**Indicators**
Angle of required movement scope

<table>
<thead>
<tr>
<th>Ref. Score</th>
<th>Or Deduction</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>0</td>
<td>✔ At maximum of required scope.</td>
</tr>
</tbody>
</table>

**Minor Deviations:**
- Around 80% of required scope.
- Uneven flexibility in different parts of the body
  - The required scope shall not be reached by lowering the quality of the posture/position.

<table>
<thead>
<tr>
<th>Ref. Score</th>
<th>Or Deduction</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.0</td>
<td>2</td>
<td></td>
</tr>
</tbody>
</table>

**Medium Deviations:**
- Just above half of required scope.
- Flexibility in some of the involved joints clearly lower than in others

<table>
<thead>
<tr>
<th>Ref. Score</th>
<th>Or Deduction</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.0</td>
<td>4</td>
<td></td>
</tr>
</tbody>
</table>

**Major Deviations:**
- Less than half of required scope.
  - Stiffness may stop the Vaulter from achieving sufficient mechanics

<table>
<thead>
<tr>
<th>Ref. Score</th>
<th>Or Deduction</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

### 3.4. Specific Deductions in Compulsory (Comp) and Technical (Tech) Exercises

<table>
<thead>
<tr>
<th>Up to 0.5 points</th>
<th>Comp&amp;Tech</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comp</td>
<td></td>
<td>• Poor Landing (Letter L)</td>
</tr>
<tr>
<td>Tech</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| 1 point | Comp       | • Failure to kneel (Letter K) before the Flag and Stand
|          |            | • Landing other than on both feet only after a dismount (Letter F) |
| 1 point | Comp&Tech  | • For each missing canter stride at the static exercises |
| 2 points | Comp&Tech  | • Repetition (Letter R) : repeating an exercise or parts of it immediately, without leaving the Horse.
  - In static exercises a repetition is given once, any time after the build up has started
    - (E.g. in Stand: after having released-releasing the grips once, retaking them and releasing them again is repetition)
    - *E.g. in the Flag without arm can be repeated from bench or seat astride position.*
  - In dynamic exercises a repetition is given once the Energy phase has started
    - (E.g. in Flank: swinging the legs forward and up twice)
  - The compulsory vault-on or the technical test mount to shoulderstand is scored with a deduction for repetition:
    - when the Vaulter loses contact with the Horse before the end of the jump phase. (taking and releasing the handles)
    - when the Vaulter comes off the Horse without losing contact during any phase of the exercise |
### FEI VAULTING GUIDELINES 2024

#### 3.5. Falls in Free Test and Technical Test

**Falls** are categorised in the table below:

<table>
<thead>
<tr>
<th>Fall Level</th>
<th>Description</th>
<th>Squad</th>
<th>Pas-de-Deux</th>
<th>Individual Free Test</th>
<th>Individual Tech Test</th>
</tr>
</thead>
<tbody>
<tr>
<td>1a</td>
<td>An unexpected move in which the/all Vaulters come rapidly and without control to the ground, caused by a loss of balance; landing out of balance and unable to maintain upright equilibrium on both feet (no contact with the Horse/equipment), during or at the end of the Test. The Horse is empty. One single deduction for all Vaulters involved</td>
<td>2.0</td>
<td>2.0</td>
<td>2.0</td>
<td>5.0</td>
</tr>
<tr>
<td>1b</td>
<td>An unexpected move in which one of the Vaulters in PdD/one or two Vaulters in Squad come(s) rapidly and without control to the ground, caused by a loss of balance; landing out of balance and unable to maintain upright equilibrium on both feet (no contact with the Horse/equipment/Vaulter on the Horse). The Horse is not empty. One single deduction for all Vaulters involved</td>
<td>1.0</td>
<td>1.0</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2a</td>
<td>Caused by a loss of balance, all Vaulters fall to the ground, landing out of balance but able to maintain upright equilibrium on both feet, (no contact with the Horse/equipment), during or at the end of the Test. The Horse is empty. One single deduction for all Vaulters involved</td>
<td>1.0</td>
<td>1.0</td>
<td>1.0</td>
<td>3.0</td>
</tr>
<tr>
<td>2b</td>
<td>Caused by a loss of balance, one of the Vaulters in PdD/one or two Vaulters in Squad fall to the ground, landing out of balance but able to maintain upright equilibrium on both feet (no contact with the Horse/surcingle/pad/Vaulter on the Horse) during or at the end of the Test. The Horse is not empty. One single deduction for all Vaulters involved</td>
<td>0.4</td>
<td>0.6</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Caused by a loss of balance, a Vaulter comes rapidly off the Horse with only their feet touching the ground and still in contact with the Horse/surcingle/pad/other Vaulter on the Horse and remounts onto the Horse. Ground jump after a loss of balance</td>
<td>0.4</td>
<td>0.6</td>
<td>0.6</td>
<td>2.0</td>
</tr>
<tr>
<td>4</td>
<td>Ground jump with double touchdown with both feet before remounting onto the Horse.</td>
<td>0.4</td>
<td>0.6</td>
<td>0.6</td>
<td>2.0</td>
</tr>
</tbody>
</table>
After a dismount, the Vaulter is not able to maintain equilibrium on both feet and touches the ground with other parts of the body than the hand(s).

💬 This does not include the deductions for the preceding dismount

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Sa</td>
<td>0.2</td>
<td>0.4</td>
<td>0.4</td>
</tr>
</tbody>
</table>

After a dismount, the Vaulter is not able to maintain equilibrium on both feet and also touches the ground with hand(s).

💬 This does not include the deductions for the preceding dismount

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Sb</td>
<td>0.1</td>
<td>0.2</td>
<td>0.2</td>
</tr>
</tbody>
</table>

The Falls are recorded on the score sheet by writing down an “F” and the deduction.

### 3.6. Counting the Canter Strides

Once a static position is displayed, the count of the canter strides starts the next time that the Horse’s back is in the lowest position and the inner front leg moves forward (see picture).

### 3.7. Landing on the Ground

All Landings must be controlled and balanced, absorbing the landing forces:

**Mechanics:**
- Centre of Gravity above the supporting feet
- Knees slightly bent
- Knees and ankles hip-width apart
- Upper body slightly bent forward in the absorption phase of the landing, before coming back to a physiologically correct, upright position (lower back neither arched or rounded)
- Spine in physiological upright position
- No arch in the lower back
- Arms may be extended in front, in order to maintain the balance and keep the chest up in during the Landing, while moving forward
- After absorption, briefly jumping up is allowed
- Run in the direction induced by a correct Landing of the respective dismount.
Deduction for incorrect Landing:

<table>
<thead>
<tr>
<th>Up to 0.5 points</th>
<th>Compulsory Test</th>
<th>Poor Landing (Letter L)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 5 points</td>
<td>Free Test/Technical Test</td>
<td>Poor Landing (Letter L)</td>
</tr>
</tbody>
</table>

In case of a Fall at Landing, the deduction for incorrect Landing is included in the deduction for the Fall.

4. COMPULSORY TEST

4.1. General

Each Compulsory exercise receives a mark; decimals are allowed.
In the Squad Competition Vaulter 1 shows every Compulsory exercise and is then followed by Vaulter 2 and so on.
In Individual Competition, if more than one Vaulter is competing on the Horse and they run in together, each Vaulter performs their compulsory exercises, following the dismount of the prior Vaulter, without waiting for the bell.
In the Pas-de-Deux 1* Competition Vaulter 1 shows every compulsory exercise and is then followed by Vaulter 2.
If the Horse canters on the right hand, all Compulsory exercises are laterally reversed.

Squad Comp 1 Test

Exercises to be shown:
1. Vault On
2. Basic Seat
3. Flag
4. Stand
5. Swing Forward *legs closed*
6. Half Mill
7. Swing Backward *legs open*, followed by dismount to inside

Squad Comp 2 Test

Exercises to be shown:
1. Vault on
2. Basic Seat
3. Flag
4. Mill
5. Scissors Forward
6. Scissors Backward
7. Stand
8. Flank 1st part, followed by dismount to the inside

**Squad Comp 3 Test**
Exercises to be shown:
1. Vault on
2. Flag
3. Mill
4. Scissors Forward
5. Scissors Backward
6. Stand
7. Flank 1st part (back to the seat astride)
8. Swing off from the seat astride to the outside

**Individual Comp 1 Test**
Exercises to be shown:
1. Vault on
2. Basic Seat
3. Flag
4. Stand
5. Swing Forward *legs closed*
6. Half Mill
7. Swing Backward *legs open*, followed by dismount to inside

**Individual Comp 2 Test**
Exercises to be shown:
1. Vault on
2. Basic Seat
3. Flag
4. Mill
5. Scissors Forward
6. Scissors Backward
7. Stand
8. Flank 1st part, followed by dismount to the inside

**Individual Comp 3 Test**
Exercises to be shown:
1. Vault on
2. Flag
3. Mill
4. Scissors Forward
5. Scissors Backward
6. Stand
7. Flank 1st part (back to the seat astride)
8. Swing off from the seat astride to the outside

7. Flank 1st part
8. Flank 2nd part (Swing off from the seat astride to the outside)
FEI VAULTING GUIDELINES 2024

Individual Comp FEI Challenge I/II (See FEI Vaulting World Challenge rules)

Additional exercises:
1. Flag without arm
2. Free Kneel

Pas de Deux Comp Test

Exercises to be shown:
1. Vault on
2. Basic Seat
3. Flag
4. Stand
5. Swing Forward *legs closed*
6. Half Mill
7. Swing Backward *legs open*, followed by dismount to inside

4.2. Description of the Compulsory Exercises and Scoring Criteria

Vocabulary to describe the deviations in the reference scores:

<table>
<thead>
<tr>
<th>Score</th>
<th>Word</th>
</tr>
</thead>
<tbody>
<tr>
<td>9</td>
<td>Slight deviation</td>
</tr>
<tr>
<td>8</td>
<td>Minor deviation</td>
</tr>
<tr>
<td>7</td>
<td>Small deviation</td>
</tr>
<tr>
<td>6</td>
<td>Medium deviation</td>
</tr>
<tr>
<td>5</td>
<td>Significant deviation</td>
</tr>
<tr>
<td>4</td>
<td>Major deviation</td>
</tr>
</tbody>
</table>

Cases not covered by the specific descriptions below, can be dealt with according to the tables with the description of each General Criteria below (Harmony with the Horse, Body Control & Posture, Quality of Movement, Balance, Flexibility) see article 3.3. Scoring of the exercises.

4.2.1. Vault-on

Essence:
Harmony with the Horse
Quality of Movement
Body Control & Posture

Mechanics:
The Vault-on is a dynamic exercise and comprises 5 biomechanical phases:

1. Jump phase starts when touching the surcingle
2. Swing phase starts when feet lose contact with ground
3. Stem phase starts when pushing with arms
4. Lowering phase starts when lowering the Center of Gravity
5. Landing Phase starts when touching Horse (with legs, pelvis), ends with seat astride

1. With both hands touching any part of the surcingle the vaulter jumps off with both feet side by side, close to the Horse. The upper body is upright.
2. The right leg is in line with the upper body and swings up as high as possible. On the way up (Swing & Stem) the left leg bends at the hip to remain pointing down.
3. At the beginning of the Stem phase, the Vaulter changes from pulling to pushing with their arms. The right leg remains line with the upper body, as the Vaulter reaches a balanced, vertical handstand position with a straight body axis. Pelvis and shoulders are parallel to the shoulder axis of the Horse.
4. Following a momentary handstand position, the Vaulter moves the shoulders forward to keep the Center of Gravity above the middle of the supporting area (hands) while absorbing the canter movement with the arms and maintaining the arm extension. The right leg and body are lowered slowly in a controlled, fluid and well balanced movement, with a constant speed.
5. Soft erect and centred Landing in the seat astride with the upper body vertical.
The whole movement needs to be performed fluently.

Reference Scores:

✔ required for Reference Score
➖ deviation entailing maximum the corresponding Reference Score
💬 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)

| 10 | ✗ Correct Jump phase
    | ✗ At the highest point, angle between upper body and horizontal 90° (vertical)
    | ✗ At the highest point, maximum arm and shoulder extension
    | ✗ At the highest point, the Center of Gravity is above the middle of the supporting area (hands)
    | ✗ At the highest point, the shoulders are parallel and the pelvis is nearly parallel to the shoulder axis of the Horse; the body axis is straight.
    | ✗ The angle between the left leg and the pelvis/upper body is maximal 45°
    | ✗ Right leg is in line with the upper body throughout the swing and stem phase
    | ✗ Correct lowering and landing
    | ✗ Correct movement flow and balance

| 9  | ✗ Correct Jump phase
    | ✗ At the highest point, the Center of Gravity is above the middle of the supporting area (hands)
    | ✗ At the highest point, the shoulders are parallel and the pelvis is nearly parallel to the shoulder axis of the Horse; the body axis is straight.
    | ✗ The right leg is in line with the upper body throughout the swing and stem phase
    | ✗ Correct lowering and landing
    | ➖ Angle between upper body and horizontal 70°
    | ➖ At the highest point: Maximum arm extension (not including shoulders)
    | ➖ Slight irregularity in movement flow
Correct Jump phase

✔ At the highest point, center of gravity is above the middle of the supporting area and straight body axis
✔ At the highest point, the shoulders are parallel and the pelvis is nearly parallel to the shoulder axis of the Horse; the body axis is straight.
✔ Shoulders are higher than the handles
✔ Centred landing

- Minor irregularity in movement flow
- At the highest point:
  - Maximum arm extension AND angle between upper body and horizontal: 45°
  OR
  - Medium arm extension AND angle between upper body and horizontal: 70°

- Swing phase: the right leg is not in line with the upper body (minor delay)

- Touching the Horse/surcingle during the Swing and Stem phase with another part of the body than the hands (shoulder, foot...) without using this contact to push off.

Small deviation in landing

- Vaulter does not jump off with both feet simultaneously or side by side (step position...)

- At the highest point:
  - medium arm extension AND angle between upper body and horizontal 20°
  OR
  - minimal arm extension AND angle between upper body and horizontal 45°

Medium deviation in landing

- Medium irregularity in movement flow (short interruption)

- At the highest point:
  - minimal arm extension AND angle between upper body and horizontal 20°
  OR
  - no arm extension AND angle between upper body and horizontal 45°

- Stem phase: pushing off the Horse, with a part of the body other than hands/arms, with or without disruption of the movement (foot, shoulder...)
<table>

4.2.2. Basic Seat

**Essence:**
Harmony with the Horse
Balance
Body Control & Posture

**Mechanics:**
The Basic Seat is a static exercise and comprises 3 biomechanical phases:

1. **Build up phase** starts from the seat astride
2. **Static phase** starts when the static position is displayed
3. **Build down phase** starts upon completion of the static phase

1. *From the seat astride,* the Vaulter takes the arms out to the side; head faces forward

2. *The upper body is in a physiologically correct posture* (including shoulders, thorax, spine and pelvis). The ears, shoulders, hip joints and ankles form a vertical line along the Frontal plane. Most of the inside of the legs (including the knees and the middle of the lower leg) (are in contact with the pad/Horse. The Vaulter establishes a three-point seat, where 2/3 of the weight is distributed equally on the two sitting bones ischial) and 1/3 on the thighs. A strong core will hold the upper body in the neutral position while allowing the hips to remain relaxed as they absorb the movement of the Horse. The feet are pointed downwards. The arms are stretched to each side along the Frontal plane, with the fingertips at eye level. The body is supple and free from any tension other than the muscle action needed to absorb the canter and to maintain the described posture. The Vaulter is in a stable, controlled and supple position.

3. *Upon completion of the static phase,* the Vaulter simultaneously brings their arms down, while continuing to fully absorb the canter, facing forward. The Vaulter takes hold on the top of the handles.
Reference Scores:

✔️ required for Reference Score

➖ deviation entailing maximum the corresponding Reference Score

💬 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)

</table>
| 7     | - Fairly correct absorption  
       | - Loss of balance with small amplitude and duration (no more than one canter stride)  
       | - Small deviation from correct posture of the upper body or position of the legs  
       | - Small deviation in build up AND build down |
| 6     | - Medium lack of absorption, ischial bones lifting off the Horse once  
       | - Medium deviation from correct posture upper body  
       | - Medium deviation from correct position of the legs |
| 5     | - Lack of balance with significant amplitude  
       | - Significant deviation from correct posture upper body, leaning too far back AND medium deviation from correct position of the legs (e.g. chair seat) |
| 4     | - Insufficient absorption, ischial bones lifting off the Horse more than once |
4.2.3. Flag

**Essence:**
Harmony with the Horse
Body Control & Posture
Balance

**Mechanics:**
The Flag is a static exercise and comprises 3 biomechanical phases:

1. **Build up phase** starts from the seat astride
2. **Static phase** starts when the static position is displayed
3. **Build down phase** starts upon completion of the static phase

1. From the seat astride, the Vaulter comes to bench position (see picture) with both legs simultaneously, landing with the legs diagonally across the Horse’s back. The left knee is slightly left of the Horse’s spine and the left foot is slightly to the right of the Horse’s spine.

   Head faces forward. From a bench position the right leg and left arm are raised simultaneously and stretched to an evenly curved line above horizontal. The lower leg remains in permanent contact with the Horse’s back, and the weight is spread equally across the lower leg.

2. • The Static phase and the count of the canter strides starts when the static position is displayed.
   • The right hand holds on top of the handle
   • The shoulder blades are flat. The right shoulder blade is stabilized by muscle force with the maximal possible distance between the spine of the Vaulter and their shoulder blade.
   • The right shoulder joint is at approximately the same height as the hip joint. To absorb the movement of the Horse, the Vaulter’s shoulders move (forward and backwards and up and down) relative to the surcingle throughout the exercise. The Vaulter’s shoulders are above the surcingle when there is the greatest distance between the Vaulter’s upper body and the horses back.
   • The Vaulter faces forward and the head is centered with the chin is higher than the shoulders.
   • The shoulders, thorax and pelvis are parallel to the back of the Horse. The spine links the lines of the straight arm and leg in a smooth regular and stabilized arc.
   • The middle longitudinal line through the body follows the Horse’s bending on the circle and the Vaulter’s spine is in line with the median plane of the Horse.
   • The right leg is not rotated in the hip joint.
   • The fingertips and toes are level with the highest point of the head.
   • The weight is evenly spread over the left lower leg which is mostly flat on the pad; if a minor part of the lower leg and/or the foot is behind the pad, that part should be stretched but doesn’t need to be in contact with the Horse’s back.
   • During the whole static phase the upper line maintains the same distance to ground and the movement is to be absorbed by the joints of the supporting arm (the shoulders, elbows and wrists - not the shoulder blades and thorax) and by the legs (hips and knee - not pelvis or spine. The angle of the left thigh varies depending on the canter phase of Horse. In the canter phase when there is the greatest-smallest distance between the Vaulter’s upper body and the Horse’s back, the left hip joint is slightly behind the left knee.
   • The Vaulter is in a stable, controlled and balanced position throughout the exercise.
   • The counting of the canter strides ends when the Build Down phase starts.
3. Upon completion of the Static phase, the Vaulter simultaneously brings their right leg and left arm down, taking hold on the top of the handle. Vaulter supports their weight on their arms, stretches the left leg down and slides softly into the seat astride.

**For Compulsory Tests 1:**
The exercise ends in the bench position

**Reference Scores:**

- ✔ required for Reference Score
- — deviation entailing maximum the corresponding Reference Score
- 🔔 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)

| 10 | ✔ Correct absorption  
    | ✔ Correct balance  
    | ✔ Correct posture in shoulders, thorax lumbar spine and pelvis  
    | ✔ Upper body, arm and leg stable  
    | ✔ Correct alignment of body along the Horse’s spine  
    | ✔ Elevation of fingertips and toes at the level of the highest point of the head; the head is centered and the chin is higher than shoulders.  
    | ✔ Correct position of the shoulders (above or slightly behind the surcingle)  
    | ✔ Correct build up and down |
| 9 | ✔ Correct balance  
    | ✔ Correct posture in shoulders, thorax and pelvis  
    | ✔ Upper body, arm and leg stable  
    | ✔ Correct position of the shoulders (above or slightly behind the surcingle)  
    | ✔ The chin is higher than the shoulders  
    | — Slight deviation in absorption  
    | — Elevation of foot and hand at the level of the highest point of the head, but slightly uneven  
<pre><code>| — Right leg AND left arm slightly out of alignment compared to the Horse’s spine |
</code></pre>
<table>
<thead>
<tr>
<th>Page</th>
<th>Description</th>
</tr>
</thead>
</table>
| 8    | ✔ Correct balance  
✔ Upper body, arm and leg stable  
✔ Correct position of the shoulders (above or slightly behind the surcingle)  
✔ The chin is higher than the shoulders  

- Minor deviation in absorption  
- Minor deviation from correct posture in thorax, lumbar spine or pelvis  
- Elevation of foot and hand at eye level  |
| 7    | ✔ Weight unevenly spread over left lower leg  
✔ Loss of balance with small amplitude and duration (one canter stride)  
✔ Small deviation from correct posture in thorax, lumbar spine or pelvis  
✔ Upper body stable with small lack of stability in arm and leg  
✔ Right leg and left arm clearly out of alignment compared to the Horse’s spine  
✔ Elevation of foot and hand at eye level, may be uneven; the chin is higher than the shoulders  

- Shoulders clearly in front/behind surcingle  
- Build up and build down may have small deviations which are included in the Reference Score  |
| 6    | ✔ Medium deviations from correct posture in thorax, lumbar spine or pelvis turned out, too high, too low ...  

- Arm and leg clearly unstable  
- Medium deviation in alignment of the body with the spine of the Horse  

- Elevation of fingertips and toes at chin level, may be uneven; chin may be lower than shoulders.  
- Lack of balance  

- Build up and build down may have medium deviations which are included in the Reference Score  |
| 5    | ✔ Significant lack of absorption in shoulder or leg (angle between thigh and vertical almost unchanged)  

- Significant deviations from correct posture of upper body AND pelvis not in line: turned out, too high, too low, hollow back...  
- Lack of stability/tension in body, arm and leg  
- Elevation of finger tips and toes horizontal or just above and/or angle between the thigh and the vertical too wide  |
4.2.4. Flag without arm

Mechanics:
The Flag without arm is executed according to the description of the Flag, except for the position of the left arm according to the adjustments mentioned below:

1. **Build up phase:** From a bench position the right leg is raised and stretched to an evenly curved line above horizontal.

2. **Static phase:** Both hands hold on top of the handles. The shoulder blades are flat and stabilized by muscle force with the maximal possible distance between the spine of the Vaulter and the shoulder blades (see picture 2 for Flag). The shoulder joints are at approximately the same height as the hip joint. When there is the greatest distance between the Vaulter’s upper body and the Horse’s back, the shoulders are above the surcingle. The Vaulter faces forward and the head is centered with the chin higher than the shoulders. The shoulders, thorax and pelvis are parallel to the back of the Horse (see picture 3). The line of the spine and the leg form a smooth regular and stabilized arc (see picture 5 for Flag). ...

3. **Build down phase:** Upon completion of the Static phase, the Vaulter brings their right leg down. ...

The Reference Scores and pictures for Flag apply, except for the position of the left arm, that is to be handled according to the above adjustments.

**Deductions FLAG and FLAG WITHOUT ARM:**

<table>
<thead>
<tr>
<th>Up to 1 point</th>
<th>• Deviations from correct build up and down, such as right leg is stretched down before it is raised, or leg and arm not raised simultaneously.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 point</td>
<td>• Failure to kneel before the Flag without Arm (Letter K)</td>
</tr>
<tr>
<td>2 points</td>
<td>• One or both hands on surcingle but not on top of the handles&lt;br&gt;• <strong>Repeating the Flag without Arm (e.g. trot):</strong> Flag without Arm can be repeated from a bench or seat astride position.</td>
</tr>
</tbody>
</table>

4.2.5. Mill

**Essence:**
Harmony with the Horse  
Body Control & Posture  
Flexibility

**Mechanics:**
The Mill comprises 4 biomechanical phases:

1. First leg pass starts from the seat astride
2. Second leg pass starts from sideways seat inside
3. Third leg pass starts from seat backward
4. Fourth leg pass starts from sideways seat outside

1. The first leg pass starts from seat astride in a position similar to Basic seat. The right leg is stretched and carried over the Horse’s neck. The first leg pass ends with the Vaulter sitting in sideways seat inside.

2. The second leg pass starts from sideways seat inside and the left leg is carried over the Horse’s croup to backward seat.
3. The third leg pass starts from backward seat and the right leg is carried over the Horse's croup to sideways seat outside.

4. The fourth leg pass starts from sideways seat outside and the left leg is carried over the Horse's neck to seat astride.

During the whole exercise the Vaulter remains in a correct, balanced sitting position, in a physiological posture. The ears, shoulders, hip joint and ankle of the resting leg form a vertical line. The feet are pointed. During the leg passes, the upper body may lean back at a maximum angle of 10° behind the vertical, in order to remain in balance (see picture). For seat astride and backward seat, see Basic seat. In sideways seat, the Vaulter’s shoulder axis is parallel to the Horse’s spine and is facing inside; legs together with most of the legs’ backside in contact with the Horse.

All leg passes are executed in a high, wide and symmetric arc (see picture), with maximum elevation and ample movement scope. The movements are fluid, controlled and carried out with a constant speed. Each handle is released and retaken in turn as the leg passes. The moment of release or retaking the handles is up to the Vaulter. The hands are either on a handle or free and not in contact with the pad or the Horse. The head, shoulders and pelvis rotate simultaneously.

The Mill is performed in a four-stride rhythm.

Reference Scores:
The elevation shown on the pictures refers to the angle in the hip joint between the leg and the lower back; the score for the Mill is an average of the evaluation for each phase.

✔ required for Reference Score
➖ deviation entailing maximum the corresponding Reference Score
💬 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)
### 9
- Correct absorption
- Correct posture of upper body in excellent balance
- Angle between leg and upper body 20°
- Head, shoulders and pelvis rotate simultaneously
- Nearly excellent fluidity with slight changes in speed

### 8
- Correct posture, with moments of minor loss of balance and deviations in position of resting leg
- One minor deviation in absorption: only connected to the Horse via one sitting bone (instead of both) during a short moment
- Angle between leg and upper body 45°
- Good fluidity with minor changes in speed
- Minor delay between rotation of head, shoulders and pelvis.

### 7
- Correct posture, with moments of small loss of balance and deviations in position of resting leg
  - Fairly correct posture with upper body maximum 20° behind the vertical AND angle in hip joint 60°

### 6
- Medium deviation in absorption, not continuously connected with the Horse via the sitting bones, which are both lifting off/losing contact with the Horse
- Posture of upper body and balance:
  - Strongly pulling on the grips
  - Angle between vertical and pelvis 45°
- Leg moving up and down, lack of fluidity
- Medium delay between rotation of head, shoulders and pelvis
- Angle in hip joint 70°
### Deductions:

| 1 point | For each phase with one or more rhythm failures (Letter T) |

#### 4.2.6. Half Mill

**Mechanics:**

The Half Mill comprises 4 biomechanical phases:

1. First leg pass starts from the seat astride
2. Second leg pass starts from sideways seat inside

The Half Mill consists in executing the First leg pass and the Second leg pass of Mill.

The Reference Scores and graphics for Mill apply accordingly.

**Deductions:**

| 1 point | Rhythm failure between the 1st and 2nd phase (Letter T) |

#### 4.2.7. Scissors Forward

**Essence:**

Harmony with the Horse
Quality of Movement
Body Control & Posture
Mechanics:
The Scissors forward is a dynamic exercise that comprises 4 biomechanical phases:

1. **Energy phase**
   - starts in seat astride and includes the backswing
2. **Swing phase and Stem phase**
   - the Swing phase starts when body loses contact with Horse and the hands are the only point of contact; the Stem phase starts when the Center of Gravity (CoG) is above the supporting surface
3. **Lowering phase**
   - starts after the point of maximum elevation
4. **Landing phase**
   - starts when touching the Horse and ends in backward seat

1. From the seat astride with the hands on the handles, the Vaulter generates energy by taking the legs forward and up, and then swinging the legs down and backward while moving the upper body forward and down. **The hands are on the handles.**

2. The Vaulter simultaneously:
   - swings up to the point of maximum elevation with a leg movement, legs apart, according to picture 1, where the body is in an almost vertical position (around 90° to the horizontal) with fully extended arms and shoulders; as soon as the body loses contact with the Horse (except for the hands) the legs are stretched.
   - smoothly initiates a controlled and continuous rotation around the Vaulter’s longitudinal axis; the rotation starts by the beginning of the Stem phase (when the CoG is above the supporting surface)
   - executes the scissors movement with the legs: legs pass one another closely at an equal distance from the ground; they reach a step position (feet apart - see picture), with the right leg in the front, the left leg in the back; the scissors movement is initiated by the highest point of the Stem phase and completed at the very beginning of the lowering phase.
   - the pelvis is turned by an angle of at least 60° by the time the Lowering phase commences (see picture)

3. The Vaulter:
   - lowers the CoG in a controlled, fluid and well balanced movement, with a constant speed; the shoulders move forward and the CoG remains above the supporting surface. The legs remain in step position.
   - during the Lowering phase, the distance between the feet reaches the width of the Horse
   - absorbs the canter movement with the fairly straight arms

4. The Vaulter softly touches the pad with the straight legs; by that time the pelvis has fulfilled a rotation of at least 90° degrees (see picture). The Vaulter completes the rotation while sliding softly into an erect backward seat.

Trajectory of the legs
Reference Scores:

✔ required for Reference Score
➖ deviation entailing maximum the corresponding Reference Score
💬 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)

| 10 | ✔ At the highest point: maximum arm and shoulder extension AND Angle between upper body and horizontal: 90°

✔ Rotation of pelvis before lowering phase: 60°

✔ Legs pass one another closely at an equal distance from the ground; they reach a step position (feet apart - see picture 1), with the right leg in the front, the left leg in the back with right in front and left in the back

✔ Body Control and Posture: Correct
✔ Slow, controlled and balanced lowering

✔ Maximum arm and shoulder extension AND Angle between upper body and horizontal: 90° AND Rotation of pelvis before lowering phase: 0° AND at the beginning of the Landing phase, rotation of the pelvis 90°, soft landing, fluently sliding to correct backward seat. **Correct movement fluidity.**  
- Legs pass one another, with small deviations in the trajectory and width of the legs; one leg lowered sooner than the other one.  
- Small deviation in control of lowering |
At the beginning of the Landing phase, rotation of the pelvis 45°

At the highest point:
- Maximum arm and shoulder extension AND Angle between upper body and horizontal: 90° AND Rotation of pelvis before lowering phase: 0° AND at the beginning of the Landing phase, rotation of the pelvis less than 90°, sliding to backward seat with interruption(s), interruption of fluidity in handstand position.

OR

- Medium arm extension AND Angle between upper body and horizontal: 60° AND Rotation of pelvis before lowering phase: 0°

OR

- Minimal arm extension AND Angle between upper body and horizontal: 45° AND Rotation of pelvis before lowering phase: 45°

- Medium deviation of leg movement

- Body Control and Posture: medium deviation such as hollow back, kink in shoulders or hips, not in line with longitudinal axis of the Horse

- Medium irregularity in fluidity

- Fairly Hard landing

Legs with significant deviations in the trajectory and width of the legs: legs both piked, “helicopter”, one leg is dropped during the Lowering phase...

At the beginning of the Landing phase, rotation of the pelvis 0°
4.2.8. Scissor Backward

**Essence:**
Harmony with the Horse  
Quality of Movement  
Body Control & Posture

**Mechanics:**
The Scissors backward is a dynamic exercise and comprises 4 biomechanical phases:

1. **Energy Phase** starts from seat backward
2. **Swing and Stem Phase** starts when the body loses contact with Horse and the hands are the only point of contact;
3. **Lowering Phase** starts after the point of maximum elevation
4. **Landing Phase** starts when touching the Horse with a leg and ends in seat astride

1. From seat backward, the Vaulter generates energy by taking the legs backward and then swinging them forwards and up while moving the upper body backward.
2. As soon as the body loses contact with the Horse (except for the hands) the legs are stretched.  
The Vaulter simultaneously:
   - swings up (to the point of maximum elevation) with a leg movement according to picture 2 (never closed), where the upper body is above the horizontal, the arms are fully extended and the legs are close to the vertical; by the time the Lowering phase commences, the pelvis is turned by an angle of at least 30° while the left leg is pushed up along the vertical to reach the point of maximum elevation.
3. Thereafter:
   - the legs pass one another (picture), and this movement is initiated by the highest point and completed during the Lowering phase.  
   - **pelvis continue the rotation.**  
   - the Vaulter lowers the CoG in a controlled, fluid and well balanced movement, with a constant speed and moves; the CoG remains above the supporting surface (surcingle).  
   - the distance between the feet reaches the width of the Horse  
   - the Vaulter absorbs the canter movement with the fairly straight arms throughout
4. The Vaulter softly touches the pad with the straight legs; by that time the pelvis has fulfilled a rotation of at least 90° degrees.  
The Vaulter completes the rotation while sliding softly into an erect seat astride.
Reference Scores:

✔ required for Reference Score
➖ deviation entailing maximum the corresponding Reference Score
💬 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)
Angle between vertical line and upper body: more than 90° AND angle between legs and horizontal 90°
✔ Full arm extension at the highest point
✔ Rotation of pelvis before lowering phase: 30°
✔ Body Control and Posture: Correct
✔ Correct leg movement
✔ Slow, controlled and balanced lowering
✔ At the beginning of the Landing phase, rotation of the pelvis 90°
✔ Soft and centered landing AND fluently sliding to correct seat astride.
✔ Correct movement fluidity

Rotation of pelvis before lowering phase: 30°
✔ Body Control and Posture: Correct
✔ Correct leg movement
✔ Slow, controlled and balanced lowering
✔ At the beginning of the Landing phase, rotation of the pelvis 90°
✔ Soft and centered landing AND fluently sliding to correct forwards seat.
✔ Correct movement fluidity

Angle between vertical line and upper body: just below 90° AND angle between legs and horizontal 60° (full arm extension)
→ Rotation of pelvis before lowering phase: 10°
→ Body Control and Posture: Fairly correct
→ Minor deviation in leg movement (e.g. minor leg dropping)
→ Slow and fairly controlled lowering
→ At the beginning of the Landing phase, rotation of the pelvis 60°
→ Soft landing but slightly uncentered when facing forward
→ Minor irregularity in movement fluidity
7

- Angle between vertical line and upper body: 60°
- AND angle between legs and horizontal 45°
- Rotation of pelvis before lowering phase: 0°
- Body Control and Posture: with minor-small deviations, such as slight hollow back
- Fairly uncontrolled lowering
- At the beginning of the Landing phase, rotation of the pelvis 45°
- Fairly soft landing, but uncentered when facing forward; sliding to correct forwards seat with minor small interruption in fluidity.

6

- Angle between vertical line and upper body: 45°
- AND angle between legs and horizontal 45°
- Body Control and Posture: medium deviation
- Medium irregularity movement fluidity
- Fairly Hard landing

5

- Angle between vertical line and upper body: 20°
- AND angle between legs and horizontal 10°

4

- Angle between vertical line and upper body: 20°
- AND angle between legs and horizontal 0°
- Body Control and Posture: Major deviations
- Major deviation in leg movement
- Major irregularity movement fluidity
- Collapse
- Major disturbance of the comfort or balance of the Horse
- At the beginning of the Landing phase, rotation of the pelvis 0°
4.2.9. **Swing Backward legs open, followed by dismount to the inside**

**Essence:**
Harmony with the Horse
Quality of Movement
Body Control & Posture

**Mechanics:**
The Swing Backward legs open, followed by dismount to the inside is a dynamic exercise and comprises 5 biomechanical phases:

1. **Energy Phase**
   - starts from upright seat backward
2. **Swing and Stem Phase**
   - starts when the body loses contact with Horse and the hands are the only point of contact
3. **Lowering Phase**
   - starts after the point of maximum elevation
4. **Landing Phase**
   - starts when touching the Horse with a leg
5. **Dismount to the inside**
   - starts in seat backward and ends with landing on the ground

1. From upright seat backward, the Vaulter generates energy by taking the legs backward and then swinging them forwards and up while moving the upper body backward.

2. As soon as the body loses contact with the Horse (except for the hands) the legs are stretched. The Vaulter simultaneously:
   - swings up (to the point of maximum elevation) with a leg movement according to picture 2 of the Scissors backward (legs never closed), where the upper body is above the horizontal, the arms are fully extended, and the legs are close to the vertical and open throughout, at hip width apart at the highest point.

3. Thereafter:
   - The Vaulter lowers the CoG in a controlled, fluid and well balanced movement, with a constant speed and moves; the CoG remains above the supporting surface (surcingle). The Vaulter absorbs the canter movement with the fairly straight arms throughout.

4. The Vaulter softly touches the pad with the straight legs, while sliding softly into an upright seat backward.

5. Leg pass from backward seat to inside seat with the shoulder axis slightly turned forward, according to the criteria set for Mill. With closed legs, the Vaulter simultaneously turns to facing forward and stretches the arms and hips, then pushes against the handle(s) upwards and off the Horse (maximum of one track to the inside). The Vaulter releases the handles and performs a correct Landing (as described).

The Swing Backward legs closed as well as the Dismount to the inside shall be performed fluently.

4.2.10. Stand

**Essence:**

Harmony with the Horse  
Balance  
Body Control & Posture

**Mechanics:**

The Stand is a static exercise and comprises 3 biomechanical phases:

1. Build up phase starts from the seat astride  
   - *In 1* compulsory the Stand starts from bench position
2. Static phase starts when the static position is displayed
3. Build down phase starts upon completion of the static phase and ends in seat astride.

1. From the seat astride*, the Vaulter comes to bench position, with both legs simultaneously and immediately hops to both feet with the pelvis as high up as possible, while constantly absorbing the horse's canter.  
   After hopping to both feet, the handles are simultaneously released, as the Vaulter rises into an upright standing position and takes the stretched arms out to the side (while rising or once having reached the standing position).  
   Head faces forward throughout.

2. The Static phase and the count of the canter strides starts when the static position is displayed.  
   - The canter movement is absorbed by the Vaulter, mainly through the joints from feet to hip. The joints of the legs are bent just as much as necessary for absorbing the changes of the elevation of the Horse's back.  
   - The upper body remains in a physiologically correct posture. The shoulders, pelvis and the feet stay in a transversal plane of the horse parallel to the surcingle.  
   - The legs are parallel to the median plane of the Horse (see picture). The knees and feet are at hip width and point forward. The feet remain stationary, and the weight is evenly distributed over the entire soles of both feet throughout.  
   - The arms are stretched to each side along the frontal plane, with the fingertips at eye level.  
   - The body remains supple and free from any tension other than the muscle action needed to absorb the canter and to keep the described posture. The Vaulter is in a stable and controlled position.  
   - The counting of the canter strides ends when the Build down phase starts.

3. Upon completion of the static phase, the Vaulter simultaneously brings their arms down, while continuing to fully absorb the canter, facing forward.  
   The Vaulter takes hold on the top of the handles, supports some of their weight on their arms, stretches the legs down and slides softly into the seat astride.
Reference Scores:

✔ required for Reference Score
➖ deviation entailing maximum the corresponding Reference Score
💬 note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)

| 10 | ✔ Correct Absorption: Correct |
|    | ✔ Balance and Stability: The weight is evenly spread over the soles throughout the exercise (including Build up & down) |
|    | ✔ Correct Posture: Correct |
| 9 | ✓ Absorption: Correct  
Correct absorption.  

✓ Balance and Stability: The weight is evenly spread over the soles throughout the Static phase  

- Balance and Stability: A slight deviation during Build up or build down  
- Posture: leaning slightly forward or too far back  
- Posture: Legs not completely parallel to median plane (e.g. knees or feet not hip width apart – slightly too wide, too narrow) Feet wider than hip width apart |
|---|---|
| 8 | Absorption: minor lack of absorption (e.g. minor tension in upper body and/or legs during static phase)  

- Minor lack of absorption during build up or build down  
- Balance and Stability: weight unevenly spread over the feet for a short moment (~1 canter stride) during any phase of the exercise.  
- Posture: minor deviation in arms and/or shoulders position  
- Posture: Upright standing position, but the joints of the legs are bent more than necessary for compensating the change in elevation of the Horse’s back.  
- Posture: Knees closer together or wider than feet |
| 7 | Balance and Stability: small step (short step) and back (shorter than one foot) and immediately back  

- Balance and Stability: too much weight on toes, heels or one foot (~2 canter strides) during any phase of the exercise. |
| 6 | Absorption: Medium lack of absorption, not in rhythm |
### FEI Vaulting Guidelines 2024

| 5 | Balance and Stability: too much weight on toes, heels or one foot during a significant amount of time (~3 canter strides) during any phase of the exercise.  
| 4 | Balance and Stability: most of the weight is on toes, heels or one foot during most of the exercise through the whole exercise.  
| 3 | Absorption: major lack of absorption (e.g. minimal absorption throughout the whole exercise)  
| 2 | Posture: upper body more than 45° in front of the vertical AND major deviations from the physiologically correct position of the spine  

#### Deductions:

| 1 point | • For failure to kneel before the Stand (letter K) |

### 4.2.11. Free Kneel
Essence:
Harmony with the Horse
Balance
Body Control & Posture

Mechanics:
The Free Kneel is a static exercise and comprises 3 biomechanical phases:

1. Build up phase starts from the seat astride
2. Static phase starts when the static position is displayed
3. Build down phase starts upon completion of the static phase

1. From the seat astride, the Vaulter comes to bench position with both legs simultaneously, while constantly absorbing the Horse’s canter. The handles are simultaneously released, as the Vaulter rises into an upright kneeling position and takes the stretched arms out to the side (while rising or once having reached the kneeling position). Head faces forward throughout.

2. The Static phase and the count of the canter strides starts when the static position is displayed. The canter movement is absorbed by the Vaulter, mainly through the joints from feet to hip. The joints of the legs are bent just as much as necessary for absorbing the changes to the elevation of the Horse’s back. The upper body remains in a physiologically correct posture. The shoulders and pelvis stay in a transversal plane parallel to the surcingle. The lower legs are parallel to the median plane of the Horse. The knees are at hip width apart. The knees and feet remain stationary and the weight is evenly distributed over the lower legs throughout. The arms are stretched to each side along the frontal plane, with the fingertips at eye level. The body remains supple and free from any tension other than the muscle action needed to absorb the canter and to keep the described posture. The Vaulter is in a stable and controlled position. The counting of the canter strides ends when the Build down phase starts.

3. Upon completion of the static phase, the Vaulter simultaneously brings their arms down, while continuing to fully absorb the canter, facing forward. The Vaulter takes hold on the top of the handles, supports some of their weight on their arms, stretches the legs down and slides softly into the seat astride.

Reference Scores

Upper body about 45° in front of the vertical

Deductions

| Up to 1 point | Lower legs not parallel with the Horse’s spine  
| Knees wider than hips  
| Build up slow or not fluid |
| Up to 2 points | Weight unevenly spread over lower legs |

4.2.12. Flank 1st part

Essence:

Harmony with the Horse  
Quality of Movement  
Body Control & Posture

Mechanics:

The Flank 1st part is a dynamic exercise and comprises 4 biomechanical phases:

1. Energy phase starts in seat astride and includes the backswing  
2. Swing and Stem phase starts when the body loses contact with Horse and the hands are the only point of contact  
3. Lowering phase starts at point of maximum elevation  
4. Landing phase starts when touching the Horse (with legs, pelvis), ends in a sideways seat inside

1. From the seat astride with the hands on the handles, the Vaulter generates energy by taking the legs forward and up, and then swinging the legs down and backward while moving the upper body forward and down.

2. As soon as the body loses contact with the Horse (except for the hands on the handles) the legs are stretched, in line with the longitudinal axis of the Vaulter and swung upwards fluently, to reach a vertical handstand position, with fully extended arms and shoulders. The upper body is maintained in a physiologically correct posture throughout. The pelvis and shoulder axis are parallel to the shoulder axis of the Horse.

3. Following a momentary handstand position, the Vaulter moves the shoulders forward to keep the Center of Gravity above the middle of the supporting area (hands) while absorbing the canter movement with the arms and maintaining the arm extension. The legs and body are lowered slowly with bent hips in a controlled, fluid and well balanced movement, with a constant speed and correct body alignment, along the longitudinal axis, and shoulders and pelvis in a right angle to the surcingle.

4. The Vaulter softly touches the pad on the inside of the Horse, close to the surcingle, with the outside of the right lower leg; the legs are closed, the pelvis and shoulder axis are parallel and facing the hands; the Vaulter slides softly into an erect sideways seat inside, shoulder axis slightly turned forward.

From inside seat the Vaulter carries the stretched right leg over the Horse's neck in a high, wide arc (like a semi-circle). The upper body remains upright in a physiologically correct position, while the left leg remains down and in contact with the Horse with no change in position. Handles are released and retaken as the leg passes.
**Reference Scores:**

- ✔️ required for Reference Score
- ➖ deviation entailing maximum the corresponding Reference Score
- ☐ note describing additional deviations that are also included in the corresponding Reference Score (and do not entail additional deductions)

#### 4

| At the highest point: | No arm extension AND angle between upper body and horizontal: 0°
|----------------------|------------------------------------------------------------------------------------------------------------------|
|                      | Body Control / Posture: major deviations such as hollow back, not in line with longitudinal axis of the Horse, lack of tension in the legs, ...
|                      | Severe collapse on the Horse, major disturbance of the comfort or balance of the Horse

#### 3

| Weight supported on shoulder throughout the exercise |

### Deductions:

| Up to 0.5 point | deviations from described leg over and back to seat astride |
4.2.13. Flank 1st part followed by dismount to the inside

The Flank 1st part followed by dismount to the inside is a dynamic exercise and comprises 5 biomechanical phases.

**Phase 1 to 4:** see Flank 1st part at point 4.2.12.

**Phase 5 - Dismount to the inside:** starts from inside seat with the shoulder axis slightly turned forward. With closed legs, the Vaulter simultaneously turns to facing forward and stretches the arms and hips, then pushes against the handle(s) upwards and off the Horse (maximum of one track to the inside). The Vaulter releases the handles and performs a correct landing.

The Reference Scores and graphics for Flank 1st part apply, and the Dismount to the inside is to be handled according to the above description.

**Deductions:**

| Up to 1 point | • Deviations from described Dismount to the inside |

4.2.14. Swing forward **legs closed**

**Essence:**
Harmony with the Horse
Quality of Movement
Body Control & Posture

**Mechanics:**

The Swing Forward **legs closed** is a dynamic exercise and comprises 4 biomechanical phases:

1. **Energy Phase** starts in seat astride and includes the backswing
2. **Swing and Stem phase** starts when the body loses contact with Horse and the hands are the only point of contact
3. **Lowering phase** starts at point of maximum elevation
4. **Landing Phase** starts when touching the Horse (with legs, pelvis), ends in seat astride

1. From the seat astride with the hands on the handles, the Vaulter generates energy by taking the legs forward and up, and then swinging the legs down and backward while moving the upper body forward and down. The hands are on the handles.

2. As soon as the body loses contact with the Horse (except for the hands on the handles) the legs are stretched, in line with the longitudinal axis of the Vaulter and swung upwards fluently, to reach a vertical handstand position, with fully extended arms and shoulders, and closed legs. The upper body is maintained in a physiologically correct posture throughout. The pelvis and shoulder axis are parallel to the shoulder axis of the Horse.

3. Following a momentary handstand position, the Vaulter moves the shoulders forward to keep the Center of Gravity above the middle of the supporting area (hands) while absorbing the canter movement with the arms and maintaining the arm extension. The legs and body are lowered slowly in a controlled, fluid and well balanced movement, with a constant speed and correct body alignment, along the longitudinal axis, and shoulders and pelvis in a right angle to the surcingle.

4. Soft, upright and centered Landing in the seat astride with the upper body vertical.

The Swing Forward **legs closed** shall be performed fluently.

The Reference Scores and graphics for Flank 1st part apply, except for the Lowering phase, that is to be handled according to the above description.

**Deductions:**
4.2.15. Swing off from seat astride to the outside

**Essence:**
Harmony with the Horse  
Quality of Movement  
Body Control & Posture  

**Mechanics:**
The Swing off from seat astride to the outside is a dynamic exercise and comprises 4 biomechanical phases:

1. **Energy Phase** starts in seat astride and includes the backswing  
2. **Swing and Stem phase** starts when the body loses contact with the Horse and the hands are the only point of contact  
3. **Flight phase** starts when both hands lose contact with the handles  
4. **Landing Phase** starts just before the feet touch the ground, ends with running out

Phases 1 to 4: see Flank 2nd part at point 4.2.16.

The Reference Scores and graphics for Flank 2nd part apply.

**Deductions:**

1 point  
• Landing other than on both feet only (Letter F)

4.2.16. Flank 2nd Part

**Essence:**
Harmony with the Horse  
Quality of Movement  
Body Control & Posture  

**Mechanics:**
The Flank 2nd Part Swing off from seat astride is a dynamic exercise and comprises 4 biomechanical phases:

1. **Energy Phase** starts in seat astride and includes the backswing  
2. **Swing and Stem phase** starts when the body loses contact with Horse and the hands are the only point of contact  
3. **Flight phase** starts when both hands lose contact with the handles  
4. **Landing Phase** starts just before the feet touch the ground, ends with running out

1. From the seat astride with the hands on the handles, the Vaulter generates energy by taking the legs forward and up, and then swinging the legs down and backward while moving the upper body forward and down.  
2. As soon as the body loses contact with the Horse (except for the hands on the handles) the legs are stretched and closed, in line with the longitudinal axis of the Vaulter and swinging upwards. The upper body is maintained in a physiologically correct posture throughout. At an angle of between 80° and 90° to the horizontal, the Vaulter simultaneously pushes against the handles with both arms.  
3. In the beginning of the Flight phase, the Vaulter gains some additional elevation, and continues in a fluent upwards and backward movement. Legs remain stretched throughout the Flight phase. The arms are nearly straight and without tension; the elbows and wrists can be slightly bent. The arms can be in any position/direction, as long as they are symmetric and fulfill a fluid movement that is in harmony with the movement of the body.  
4. Correct Landing, next to the Horse’s track.
Trajectory of flight phase

At the end of the Stem Phase, full arm extension AND angle between upper body and horizontal: between 80° and 90°.

Pushing off with both arms simultaneously without delay

Flight phase: Correct

Correct fluidity

Body Control / Posture: Correct

Legs closed during the stem and flight phase

Correct Landing

Flight phase: pushing off with both arms simultaneously, but slightly delayed

Flight phase: fluent backward movement; no further elevation.
| 8 | ✔ Body Control / Posture: Correct  
   - At the end of the Stem Phase, full arm extension AND angle between upper body and horizontal: 60°  
   - Pushing off with minor delays  
   - Minor irregularity in fluidity  
   - Legs slightly open |

       | Body Control / Posture: Major deviations in the posture of the spine (hollow back), shoulders or hips (not parallel to the shoulderline of the Horse), not in line with longitudinal axis of the Horse ...  
       | Legs with major lack of tension  
       | Severe collapse on the Horse, major disturbance of the comfort or balance of the Horse |
| 3     | Holding the handles till Landing  
       | Landing on the Horse and **sliding off without interruption** |
| 0     | Landing on the Horse and leaving it **after a clear interruption** |
5. FREE TEST

5.1. Requirements of the Free Test

Squad Free Test 1

A Squad Free Test 1 apply to all Squads 1* and may include single and double exercises. There is no Degree of Difficulty score for Squads Free test 1 with a maximum of 6 static triple exercises. 20 free style exercises will be considered in the Degree of Difficulty.

Squad Free Test 2

A Squad Free Test 2 apply to all Squads 2* (junior, senior) and 3* and includes single, double and triple exercises. 25 free style exercises will be considered in the Degree of Difficulty for Senior Squads and 20 free style exercises for Junior Squads. Triple exercises are limited by the time allowed. For detail see article 5.4.9.

Individual Free Test

An Individual Free Test includes static and dynamic exercises. 10 Free style exercises will be considered in the Degree of Difficulty.

Pas-de-Deux Free Test 1

The Pas-de-Deux Free Test includes single mounts, single dismounts and double exercises. During the performance, both Vaulters must remain in contact with the Horse, the handles or each other (except for free jumps). Single exercises on the Horse are not scored in the Degree of Difficulty. For Pas de Deux 1*, there is no Degree of Difficulty score. For 2* Juniors, 10 Free Test exercises will be considered in the Degree of Difficulty.

Pas-de-Deux Free Test 2

The Pas de Deux Free Test includes single mounts, single dismounts and double exercises. During the performance, both Vaulters must remain in contact with the Horse, the handles or each other (except for free jumps). Single exercises on the Horse are not scored in the Degree of Difficulty. 13 Free Test exercises will be considered in the Degree of Difficulty.

Definition:

Single exercises refer to exercises, where only one Vaulter is carried by the horse.
Double exercises refer to exercises, where two Vaulters are carried by the horse.
Triple exercises refer to exercises, where three Vaulters are carried by the horse.

5.2. Structure Groups of Free Test Exercises

All information regarding Structure Groups and Judging also the Free Test exercises are in the Chapter 3 "Scoring Exercises".

5.3. Criteria for the Technique Score

In CVI1* Competitions (Children, Junior and Senior), the Technique Score represents only the Performance of the Free Test Exercises.

In CVI2* and higher-level Competitions (Children, Junior, Young Vaulter and Senior), the Technique Score is comprised of the Performance Score (70%) and Score for Degree of Difficulty (30%).

5.3.1. Performance

The maximum Score is 10 points. Scoring may be in tenths. The overall Performance score will be computed to the 3rd decimal.

Judging the Performance begins the moment the (first) Vaulter touches the surcingle, the pad or the Horse. The judging ends after the final Landing on the ground of the last Vaulter.

In all Free Tests the Average System must be used.

Average System

For each exercise or transition not performed excellently (10), deductions of 1 to 10 points will be given.
The deductions for transitions can be included in the deduction from the following exercise or written down separately. The same applies to an interruption in the performance (waiting too long to perform the next exercise).

For Deductions refer to the Chapter "Scoring Exercises", point 3.6. Reference Scores and General Deductions:

- These deductions will be averaged by the number of counted exercises (E, M, D and R exercises).
- Not-held static exercises and Falls will not be considered in the total number of exercises used to compute the average. For not-held exercises there is no automatic deduction; depending how they are performed, a deduction up to 10 points will be given.
- **The free test mount-on** is scored with a deduction for repetition:
  - when the Vaulter loses contact with the Horse before the end of the jump phase, (taking and releasing the handle).
  - Deduction of 2 points will be deducted from the performance of mount-on. The deduction needs to be given for each occasion.

**Falls**

A Fall is a movement out of control **which may result in the Vaulter touching the ground and is assessed depending on its severity**.

The Falls will be recorded by the Technique Judge and penalised by a deduction from the Performance Score. The deduction for a Fall is not averaged but is deducted at the end. See Example for Average System below.

The Falls are recorded on the score sheet by writing down an "F" and the corresponding deduction.

For categories of the Falls refer to the point 3.6. “Falls in Free Test and Technical Test”.

**Example for Average System**

**Individual Free Test**

<table>
<thead>

</tr>
<tr>
<td>D</td>
<td>7</td>
</tr>
<tr>
<td>R</td>
<td>2</td>
</tr>
<tr>
<td>Total</td>
<td>14</td>
</tr>
</tbody>
</table>

Deductions: 41

Average Deductions: 41 deductions / 14 exercises = 2,929

Average subtracted from 10,000

- 2,929 = 7,071

Deductions for falls: 3,400

Performance Score 3,671

Explanations:

In this example two elements (below E) received deductions (2, 3) which are added to the deductions for the exercises.

One D-exercise was not held and received a deduction (3) for poor performance.

During the performance there were three falls, one of them after the dismount. In the record the falls are circled or put into brackets to make clear they are not part of the averaged performance deductions.

The deductions for the falls are added in a separate box (1,0 + 2,0 + 0,4 = 3,4) and deducted from the performance score at the end.
5.3.2. Degree of Difficulty - General

The maximum score is 10 points. Scoring may be in tenths.
Judging of the Degree of Difficulty begins with the moment the first Vaulter touches the surcingle, the pad or the Horse and ends with the time limit.
The Difficulty of an exercise can be assessed using the five general criteria listed in Chapter 3. “Scoring Exercises”:
The higher the demand regarding the five general criteria, the higher is the Degree of Difficulty.
No points are awarded for:
• Static exercises held for less than three canter strides
• Free Test - exercises started after the time limit
• Exercises from any Compulsory test, never mind of the positions of the arms
• Exercises not performed in canter
• Repetition of the same exercise
• Mounts and Dismounts assisted from the ground

In the “Code of Points”, several Free test exercises with their Degree of Difficulty are listed.
See also Annex II. Degree of Difficulty

Degree of Difficulty - Individuals

The exercises are divided into four Degrees of Difficulty.
Only the 10 exercises with the highest Degree of Difficulty will be scored as follows:

<table>
<thead>
<tr>
<th>Exercise Level</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk exercise (R)</td>
<td>1.3 points</td>
</tr>
<tr>
<td>Difficult exercise (D)</td>
<td>0.9 points</td>
</tr>
<tr>
<td>Medium exercise (M)</td>
<td>0.4 points</td>
</tr>
<tr>
<td>Easy exercise (E)</td>
<td>0.0 points</td>
</tr>
</tbody>
</table>

Risk Exercises in Individual Free Test:
D-Exercises will become Risk-Exercises (R):

• If the shown exercise is a variation of an existing D-Exercise but performed with considerably higher difficulty (higher demand on general criteria). e.g.: A somersault is a D-Exercise, a somersault with two turns becomes a R-Exercise.
• Variations of existing D-Exercises, the difficulty of which cannot be increased e.g.: handstand on one arm.
• If the build-up or build-down of a D exercises is very difficult.
• If a series of D-Exercises is performed in immediate succession (the build-down is the build-up of the next exercise).

Degree of Difficulty - Squads

The exercises are divided into three Degrees of Difficulty.

**Squads Free Test 1**
Only the 20 exercises with the highest Degree of Difficulty will be scored as follows:

<table>
<thead>
<tr>
<th>Exercise Level</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Difficult exercise (D)</td>
<td>0.5 points</td>
</tr>
<tr>
<td>Medium exercise (M)</td>
<td>0.3 points</td>
</tr>
<tr>
<td>Easy exercise (E)</td>
<td>0.1 points</td>
</tr>
</tbody>
</table>

**Squads Free Test 2 - JUNIORS**
Only the 205 exercises with the highest Degree of Difficulty will be scored as follows:

<table>
<thead>
<tr>
<th>Exercise Level</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Difficult exercise (D)</td>
<td>0.45 points</td>
</tr>
<tr>
<td>Medium exercise (M)</td>
<td>0.3 points</td>
</tr>
<tr>
<td>Easy exercise (E)</td>
<td>0.1 points</td>
</tr>
</tbody>
</table>
Squads Free Test 2 – SENIORS

Only the 25 exercises with the highest Degree of Difficulty will be scored as follows:

<table>
<thead>
<tr>
<th>Difficult exercise (D)</th>
<th>0.4 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medium exercise (M)</td>
<td>0.3 points</td>
</tr>
<tr>
<td>Easy exercise (E)</td>
<td>0.1 points</td>
</tr>
</tbody>
</table>

Degree of Difficulty - Pas de Deux

The exercises are divided into three Degrees of Difficulty.

Pas De Deux Free Test 1

1* Juniors and Seniors – No Degree of Difficulty

2* Juniors:

Only the 10 exercises with the highest Degree of Difficulty will be scored as follows:

<table>
<thead>
<tr>
<th>Difficult exercise (D)</th>
<th>1 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medium exercise (M)</td>
<td>0.5 points</td>
</tr>
<tr>
<td>Easy exercise (E)</td>
<td>0.0 points</td>
</tr>
</tbody>
</table>

Pas De Deux Free Test 2 – 2* Seniors and 3* Seniors

Only the 13 exercises with the highest Degree of Difficulty will be scored as follows:

<table>
<thead>
<tr>
<th>Difficult exercise (D)</th>
<th>0.8 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medium exercise (M)</td>
<td>0.4 points</td>
</tr>
<tr>
<td>Easy exercise (E)</td>
<td>0.0 points</td>
</tr>
</tbody>
</table>

Exercises to be scored for Degree of Difficulty in Pas de Deux Free Test:

- The mount and dismount of each Vaulter.
- **Single** exercises on the Horse are not scored in the Degree of Difficulty.
- Double exercises:
  - static exercises being shown simultaneously: the most difficult one is scored,
  - 1 static and 1 dynamic exercise are performed simultaneously: each exercise receives a separate Difficulty score, (only if the Vaulters do not support of stabilize each other
  - 2 dynamic exercises from different structure groups are performed (f.eg. one Vaulter performs a roll, while the other one performs a ground-jump): each exercise receives a separate Degree of Difficulty score,
  - 2 dynamic exercises from the same structure group are performed (f.eg. two similar ground-jumps): the most difficult one is scored.

Exercises to be scored for Degree of Difficulty in Squad Free Test:

- The mount and dismount of each Vaulter.
- **Single** exercises (static and dynamic) are all scored.
- Double and Triple exercises:
  - static exercises being shown simultaneously: the most difficult one is scored,
  - 1 static and 1 dynamic exercises are performed simultaneously: each exercise receives a separate Difficulty score, (only if the Vaulters do not support of stabilize each other
  - 2 dynamic exercises from different structure groups are performed (f.eg. one Vaulter performs a roll, while the other one performs a ground-jump): each exercise receives a separate Degree of Difficulty score,
  - 2 dynamic exercises from the same structure group are performed (f.eg. two similar ground-jumps): the most difficult one is scored.

5.4. **Artistic Score**

5.4.1. General

The Artistic Score is judged on the following criteria:
Judging of the Artistic Score begins the moment the first Vaulter touches the surcingle, the pad or the Horse and ends with the time limit. The maximum score is 10 points. Scoring may be in tenths.

- In the Squad competition 1 mount and 1 dismount assisted from the ground are allowed without penalty. Each additional mount and/or dismount assisted from the ground will incur 0.5 deduction from the overall Artistic score.

Decorative Accessories/props
Decorative Accessories must be made of soft, cloth-like and/or pliable material. They must not, in any way, compromise the safety of either the Horse or the Vaulter(s). (One example of a non-allowable Accessory is sharp and/or pointed hair accessories made out of a hard material).

The Vaulter’s face must be visible to the judge(s): No masks nor complete face paint is allowed. (A maximum of one-quarter of the face may be painted).

Props are not allowed in the arena(s). Props are any article carried or worn into the arena which are detachable from the Vaulter(s) or Lunger, for example: Belts (worn on the outside of the dress), hats, capes, dress alterations to enhance the grip, gadgets (including lights) are strictly forbidden in the arena.

The Lunger’s attire must be clean and neat and should complement the Vaulter’s attire whenever practical.

The scores C to C4 will be written down on the score sheet and the scoring office will calculate it.
5.4.2. CoH – Consideration of the Horse, and Harmony with the Horse

Consideration of the Horse, and Harmony with the Horse addresses the partnership between the Vaulter and the Horse. Reference scores address how the Vaulter adapts to the training level and the current physical / mental / emotional state of the Horse.

For Squads: If triples are included, it is recommended that triples do not exceed more than 1/3 of the time of the Freestyle.

Reference scores:

<table>
<thead>
<tr>
<th>Up to 10 Points</th>
<th>Excellent consideration</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Weight</strong>: the weight carried by the Horse, positions and movements of the Vaulter match the Horse all the time.</td>
<td></td>
</tr>
<tr>
<td><strong>Composition</strong>: test conceived and presented in full harmony with the Horse’s build, training level and canter quality on the circle.</td>
<td></td>
</tr>
<tr>
<td><strong>Balance</strong>: static combinations and dynamic exercises should not affect balance of the Horse.</td>
<td></td>
</tr>
<tr>
<td><strong>Contact/Liaison/Collaboration</strong>: The Vaulter’s movements do not affect the Horse’s balance, canter movement, body alignment or ability to remain on the chosen circle line.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Up to 8 Points</th>
<th>Good consideration</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Weight</strong>: the weight carried by the Horse, positions and movements of the Vaulters match the Horse at any time.</td>
<td></td>
</tr>
<tr>
<td><strong>Composition</strong>: test conceived and presented in full harmony with the Horse’s build, training level and canter quality on the circle.</td>
<td></td>
</tr>
<tr>
<td>Balance: static combinations and dynamic exercises are mostly balanced and mostly not affecting balance of the Horse.</td>
<td></td>
</tr>
<tr>
<td><strong>Contact/Liaison/Collaboration</strong>: The Vaulter’s movements do not significantly affect the Horse’s balance, canter quality, body alignment or ability to remain on the chosen circle line.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Up to 6 Points</th>
<th>Satisfactory consideration</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Weight</strong>: the weight carried by the Horse, position and movement of the Vaulters mostly matches the Horse’s training level, but during a short amount of time, the Horse is somewhat overloaded and/or struggles to maintain a consistent canter.</td>
<td></td>
</tr>
<tr>
<td><strong>Composition</strong>: test contains some exercises/combinations that may not match the Horse’s build or training level and affect its canter movement on the circle.</td>
<td></td>
</tr>
<tr>
<td>Balance: static combinations and dynamic exercises sometimes affect balance of the Horse.</td>
<td></td>
</tr>
<tr>
<td><strong>Contact/Liaison/Collaboration</strong>: The Vaulter’s movements sometimes affect the Horse’s balance, canter quality, body alignment or ability to remain on the chosen circle line. The Horse reacts to an exercise at least once.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Up to 4 Points</th>
<th>Insufficient consideration</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Weight</strong>: the weight carried by the Horse, position and movement of the Vaulter often does not match the Horse. The Horse is overloaded by the test and struggles to maintain a consistent canter several times.</td>
<td></td>
</tr>
<tr>
<td><strong>Composition</strong>: test contains many exercises/combinations that do not match the Horse’s build or training level and affects canter quality and circling.</td>
<td></td>
</tr>
<tr>
<td><strong>Balance</strong>: static combinations and dynamic exercises frequently affect the balance of the Horse.</td>
<td></td>
</tr>
<tr>
<td><strong>Contact/Liaison/Collaboration</strong>: The Vaulter’s movements clearly disturb the Horse’s balance, canter quality, body alignment or ability to remain on the chosen circle line. The Horse reacts to exercises several times.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Up to 2 Points</th>
<th>Bad consideration</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Weight</strong>: the weight carried by the Horse, positions and movements of the Vaulters constantly do not match the Horse during most of the test. The Horse is overloaded by the test and struggles to maintain a consistent canter throughout the test.</td>
<td></td>
</tr>
</tbody>
</table>
Composition: test contains numerous exercises/combinations that do not match the Horse’s build or training level and significantly affects canter quality and circling.

Balance: static combinations and dynamic exercises affect balance of the Horse.

Contact/Liaison/Collaboration: The Vaulters movements often disturb the Horse’s balance, canter movement, body alignment or ability to remain on the chosen circle line. The Horse repeatedly reacts to exercises.

### 5.4.2. 5.4.3. C1 - Variety of Exercises – Individuals

The individual Free Test should include a great variety of structure groups and/or individual exercises, demonstrating the broad technical and physical capability of the Vaulters.

C1 structure groups as well as individual exercises (as defined in the Code of Points) are assigned to groups- Each group contains multiple structure groups which represent a similar technical or physical capability.

#### Reference Basic Score 10 for C1

A 10 is given if the minimum requirement for each defined group is met. It is the artistic freedom of each Vaulter to show more exercises from the defined groups #1 to #10.

C1 is a calculated score based on the definition of the minimum requirements for the score of 10, taking any possible deductions or deviations from the score 10 into account, where applicable. (See below defined scoring rules and defined deductions).

Expected ratio between static and dynamic exercises is approximately 40:60 / 60:40.

### C1 Groups:

Group #1 to #5 represent static exercises; Group #6 to #10 dynamic exercises. It is possible that one exercise is counted for more than one group.

## 5.4.3.5.4.4.C2 - Variety of Positions - Individuals

The individual Free Test should include a great variety of positions in relation to/on the Horse and directions of movements in relation to the Vaulter’s body. The Free Test should also show a balanced use of space on the Horse.

**Base Score 10 for C2**

A 10 is given if all required directions (6) and all required positions (6) are shown at least one time in the individual Free Test. C2 is a calculated score based on the definition of the minimum requirements for the score of 10, taking any possible deductions or deviations from the score 10 into account, where applicable (see below defined scoring rules and defined deductions).

<table>

  - Loop
  - Ground Jump

- **Outside**
  - Loop
  - Ground Jump

### C2 Scoring Rules:

1. One static exercise is counted for at least one position and one direction.
2. One dynamic exercise may be counted for its start position, end position and one direction.
3. The direction of a static exercise is determined if more than 70% of the body is facing that direction (measured by shoulder and hip axis).
4. A dismount has one start position and a dynamic direction (e.g., roll forward from knee position on back, position #3 and direction #5).
5. Mount on has one end position and may have one static and one dynamic direction (e.g., mount on into Prince backward - position #3 and direction #6 and #2, e.g., mount on Prince, position #3 and direction #1).
6. For each direction and position not shown in the Free Test a deduction will be given.
7. The predominant use of one direction or one position will result in a deduction.
8. It is expected that the position “back” will be used more often than other positions on the Horse Reason: The back is often the start and end position of dynamic exercises, and the neck and surcingle area have less carrying power and should not be overused). A ratio of more than 1:5 will be considered an overuse of the back position and will result in a deduction.
Deduction:

For each required direction and position not covered in the individual Free Test. | 1.0 point
---|---
Overuse of one direction or position in relation to the total number of exercises shown (ratio over 1:3). | Up to 1 point
Back position (ratio over 1:5) | Up to 1 point
Overuse of one position in relation to the total number of exercises shown | Up to 1 point

5.4.4.5.4.5.C1 - Variety of Exercises – Squads and Pas de Deux

All combinations should be shown. They may be performed as doubles or triples; triples are not required.
The Squad Free Test should include a great variety of Structures and Combinations.

Structures – the Groups listed under 5.4.3.2 should be shown. Ground jumps from outside are not required.

Combinations – the Combinations below should be shown:

Single
- **Single exercises**: only one Vaulter on the Horse

Supporting
- **Double exercises**:
  - Double supporting exercises: one Vaulter supports a significant part of the full weight of the other one
  - OR
  - Triple supporting exercises: One (or two) Vaulter(s) support a significant part of the full weight of another, the weight of the third Vaulter (flyer) is mainly supported by one or two others if one Vaulter supports the full weight of the flyer, that Vaulter is assisted or stabilized by a stabilizing base.

Stabilized
- **Double stabilized exercises**: one Vaulter stabilizes or/and partially supports their partner’s weight in order to balance or support them.

Combined
- **Double combined exercises**: two individual exercises (two static exercises /or one static and one dynamic exercise) performed simultaneously without lifting/support contact between the Vaulters at the same time, with little or no weight of one Vaulter supported by the other one
  - OR
  - Triple combined exercises: three individual exercises performed at the same time, with little or no weight of any Vaulter supported by the others. (At least one static exercise)
  - OR
  - Triple semi-combined exercise: a supported double exercise in combination with a single individual exercise

Combined dynamics
- **Combined dynamics**: two (or three) dynamic exercises performed at the same time.

5.4.6.C1 - Variety of Exercises – Pas de Deux

All combinations should be shown.

Supporting
- **Double supporting exercises**: one Vaulter supports the full weight of the other one.

Stabilized
- **Double stabilized exercises**: one Vaulter stabilizes or/and partially supports their partner’s weight in order to balance or support them.

Combined
- **Double combined exercises**: two individual exercises (two static exercises /or one static and one dynamic exercise) performed simultaneously without lifting/support contact between the Vaulters.

Combined dynamics
- **Combined dynamics**: two dynamic exercises performed at the same time.

---

**Triple exercises** – Squads 2* and 3*:
- **Triple supporting exercises**: two Vaulters support a significant part of the weight of another one, the weight of the third Vaulter (flyer) is mainly supported by one or two others
- **Triple semi-combined exercise**: a supported double exercise in combination with a single exercise
Roles - the Roles below should be spread fairly evenly among the squad members:
- Supporting Vaulternbase: supporting the complete weight of another Vaultern
- Stabilizing Vaulternbase: stabilizing the supporting Vaulternbase (Squads only) or Assisted Vaultern
- Assisted Vaultern: is assisted by a Stabilizing Vaultern that who helps the Assisted Vaultern to keep their balance but is not supporting most if their full weight (only part of it)
• **Flyer**: weight of the Vaulter is mainly supported by one or two other others
• **Individual performer**: showing an individual exercise without being assisted/stabilized very little or no weight supported by another Vaulter.

### Reference scores – Squads - Participation in Roles and Artistic Involvement.

<table>
<thead>
<tr>
<th>Reference Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
</table>
| **Up to 10 Points** | Excellent balance in participation | ✓ All Vaulters take turns as a “supporting or stabilizing” and “flying or assisting” Vaulter.
✓ All Vaulters contribute substantially to the test; they equally participate in the artistic involvement. |
| **Up to 8 Points** | Good balance in participation      | Several Vaulters take turns as a “supporting or stabilizing” and “flying or assisting” Vaulter.         |

  — All Vaulters contribute to the artistic involvement.

  — Several Vaulter(s) can be slightly unbalance in the artistic involvement. There is still the impression of a good contribution throughout the test.

  — Several Vaulter(s) can be slightly unbalanced in participation.

| **Up to 6 Points** | Satisfactory balance in participation | Several Vaulters take turns as a stabilizing and assisting Vaulter.                                      |

  — Only one Vaulter acts as a flyer, however all Vaulters actively contribute to the test.

  — The artistic involvement is unbalanced between the Vaulters.

  — The participation involvement is unbalanced between the Vaulters.

| **Up to 4 Points** | Some overuse in participation        | One or more Vaulter(s) convey(s) the impression of contributing considerably more to the test - in roles and artistic involvement. |

  — One or more Vaulter(s) are clearly propping and stabilising, and the other(s) flying and being assisted disproportionately.

  — The participation involvement is clearly unbalanced between the Vaulters.

| **Up to 2 Points** | Clear overuse in participation       | One Vaulter is the main actor/participant of the test.                                                   |

  — While the contribution of the other(s) is/are very minor in roles and artistic involvement.

### Reference scores – Pas de Deux - Participation in roles and artistic Involvement.
### FEI VAULTING GUIDELINES 2024

#### 5.4.6.5.4.8. C3 – Unity of Composition & Complexity – Individuals, Squads, Pas de Deux

**Basic scores:**

- **10** Excellent — Excellent selection of elements and sequences continuously demonstrating a fluid connection in harmony with the Horse.

- **8** Satisfactory — Appropriate selection of elements and sequences mainly demonstrating a fluid connection in harmony with the Horse.

- **6** Fairly bad — Poor selection of elements and sequences rarely demonstrating a fluid connection in harmony with the Horse.

- **0** NO HARMONY WITH THE HORSE

**Definitions:**

- **Flow:**
  The flow of the test is clear, light, easy and smooth.
- **Control:** The ability to make active postural adjustments and to direct the body and limbs to perform a specific movement intentionally.

- **Complexity:** An element or sequence is complex under the conditions below:
  - Elaborate and outstanding way of assembling exercises, combinations, transitions, sequences, positions, directions,...
  - A single element which stands out through outstanding difficulty achieved through, for example: very small supporting surface, several axes/directions, special position the Horse, unusual contact points between the Vaulter's body and the Horse or between Vaulters,...

For Pas de Deux and Squads:
- **excellent complexity:** Double or Triple exercises with a very high demand on complexity of the posture and/or balance of the supporting Vaulter (e.g. free standing base, or flying exercise supported by standsplit)

- **excellent coordination:** Double or Triple exercises with high demand on coordination between the Vaulters (complex build up/build down, combination of simultaneous complex dynamic exercises)

- **excellent supporting or stabilizing sequences:** sequences where the supporting or stabilizing base executes a change in posture, Level and/or Direction while supporting.

- **Connection:** Interaction between the Vaulters to coordinate their movements. It allows movement to flow from one body to another in different ways, like - directing, following, imitating, counteracting etc.

- **Freedom of Movement**
  Ability to cover and combine several positions, directions, orientations, and levels with static or/and dynamic elements/exercises in a creative, unique or unexpected use of space. The Vaulter(s) give a feeling to move unrestrained in balance, the distance with handles varies and comes close to its potential maximum.

</tr>
</tbody>
</table>
**FEI VAULTING GUIDELINES 2024**

**Up to 8 Points**

- **Well-connected test with moments of hesitation.**
  - **Elements are essentially controlled throughout the test.**
  - **Predominantly complex.**
  - **Vaulter(s) are creative and move(s) fairly unrestrained and with varying distance from the handles.**
  - **Essentially well connected for Squad and Pas de Deux.**
  - **One fall with loss of contact and empty Horse = 8 max.**

  (In case of one Fall with loss of contact and empty Horse (1a, 2a) 8.0 would be the maximum score for C3.)

- **Flow:**
  Exercises are well connected. Good flow with moments of hesitation, with minor lack of flow and smoothness. There is some lightness and a floating effect but not fully consistent throughout.

- **Control:**
  All elements match the training level of the performing Vaulter(s) and are essentially controlled. The entire test is performed with a constant level of safety.

- **Complexity:**
  Most of the time complex and creative positions, exercises (including mounts and dismounts), combinations, transitions and sequences are shown.

- **Freedom of movement:**
  - Creative or uncommon use of space. Exercises are combined differently and cover various directions, orientations, diagonals and levels.
  - The Vaulter(s) move(s) fairly unrestrained in balance. Voluntary and controlled moments of suspension between balanced moves. The distance from the handles varies.

- **In Squad/Pas de Deux:**
  - **Connection:**
    - Vaulter(s) are essentially well connected, their interaction is meaningful, but not fully consistent.
    - Individual excellence mostly serves the Squad’s unity.

**Up to 6 Points**

- **Flow visible, but sometimes interrupted.**
  - **Several elements are not performed in a controlled way.**
  - **Occasionally complex.**
  - **Vaulter(s) are occasionally creative and, mostly close to the handles.**
  - **Connection with little synergy beyond just stabilising and/or supporting.**
  - **Two or more falls with loss of contact and empty Horse = 6 max.**

  (In case of two or more Falls with loss of contact and empty Horse (1a, 2a) 6.0 would be the maximum score for C3.)

- **Flow:**
  Sometimes interrupted by lack of adequate transitions or by laborious build ups/downs. The Vaulter(s) show several lack of flow and smoothness in moves/transitions. Flow is sometimes visible.

- **Control:**
  Several elements do not match the training level of the performing Vaulter(s) and/or are not performed in a controlled way. Satisfactory level of safety.

- **Complexity:**
  The Vaulter(s) occasionally use(s) positions, directions, exercises (including mounts and dismounts), combinations, transitions and sequences with an average complexity.

- **Freedom of movement:**
  - Occasionally creative use of space, position and/or direction, and/or orientation, and/or Level during elements/exercises.
  - The Vaulter(s) mainly show(s) moves that can be performed in full balance, but without controlled moments of suspension between them.
  - The Vaulter(s) is/are mostly close to the handles.

- **In Squad / Pas de Deux :**
  - **Connection:**
    - Vaulters are disconnected on a few occasions, but they sometimes show some synergy beyond just stabilising and/or supporting each other.
    - Basic interaction between Vaulters.
    - Individuality rarely serves the Squad’s unity.
### Up to 4 Points
- Frequent interruptions.
- Lack of control and level of safety begins to decreasing.
- No complex elements.
- No creativity, always close to the handles.
- Insufficient quality and variety of connection.

### Flow:
Repeated interruptions due to a lack of adequate transitions and laborious build ups/downs. Lack of flow and smoothness in moves/transitions. Very few sequences show a sufficient flow.

### Control:
Many elements exceed the Vaulter’s capabilities and/or medium to major lack of control. Level of safety begins to decreasing...

### Complexity:
No complex positions, exercises (including mounts and dismounts), combinations, transitions and sequences.

### Freedom of movement:
- No creative use of space, basic position and/or orientation and/or direction and/or level, during elements/exercises.
- The Vaulter(s) is/are always close to the handles.

#### In Squad / Pas de Deux :
- Connection:
  - Insufficient quality and variety of connection with frequent interruptions.
  - Vaulters mainly connected to stabilize each other with a clear lack of synergy.

### Up to 2 Points
- No fluidity, constant interruptions.
- Elements are not controlled and affect the Horse. Clear lack of safety throughout.
- Only very basic elements.
- No creativity and constantly unbalanced and pulling on the handles throughout.
- Vaulters constantly struggle to stay connected.

### Flow:
No flow and smoothness, test constantly interrupted by lack of adequate move/transitions. Vaulter(s) constantly struggle(s).

### Control:
Elements not performed in a controlled way, affecting the Horse. Vaulter(s) over-taxed with the chosen exercises. Clear lack of safety throughout.

### Complexity:
Only very basic positions, exercises (including mounts and dismounts), combinations, transitions.

### Freedom of movement:
No creative use of space, very basic position and/or orientation and/or direction and/or level, during elements/exercises. Constantly unbalanced and pulling on the handles throughout.

#### In Squad / Pas de Deux :
- Connection:
  - No quality and no variety.
  - Vaulters are only connected to stabilize each other, which they struggle to achieve.

### 5.4.7-5.4.9.C4 – Music Interpretation/Expression/Body Language – Individuals, Squads, Pas de Deux

The following table shows the Reference Score\_basic scores for C4 Music Interpretation. For each section, the expected level of performance is summarized with a general description and a list of observations is provided. The observations give a guidance of what to look for per Reference Score\_basic score box. It is not expected that
all observations are shown but most of them should apply, to score the highest point of each box. Otherwise the lower points of the box should be selected for the score.

**Basic Reference Scores:**

<table>
<thead>
<tr>
<th>Base Score</th>
<th>Description</th>
<th>Observation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Up to 10 Points</strong></td>
<td>Deeply engaged Vaulter/s. Captivating interpretation of music. High level and variety of expression in answer to different musical elements. Incarnation of a character or the music by the Vaulter’s • Vaulter/s immerse themselves in the music, and performance is deeply linked with the music. • Performed moves and sequences that serve the artistic concept. • Creative body language, with complex, multidirectional gestures and moves, (conveying /expressing/communicating) the concept/musical universe. • Performance is adjusted to changes in rhythm, tempo and style within the music when they occur. Sequences of elements and moves continuously in excellent match to the music. • Vaulter/s is/are very expressive, generous, totally committed throughout the performance and show/s variety in interpretation, presence and emotional engagement.</td>
<td></td>
</tr>
<tr>
<td><strong>Up to 8 Points</strong></td>
<td>Engaged Vaulter/s Significant interpretation of some musical elements, matching body language. Good level of expression in conjunction with musical elements and good variety. • Artistic concept can be clearly identified and recognized during most parts of the performance. • Artistic concept is outlined through the moves and body-language. • The performance is mostly adjusted to changes in rhythm, tempo, or style within the music when they occur. • Vaulter/s occasionally show/s convincing facial expression, gestures and body language, matching the music and artistic concept. • Interpretation is sometimes disconnected when performing highly complex elements or sequences. • Vaulter/s show/s good expression, variety in interpretation and demonstrates some emotional engagement.</td>
<td></td>
</tr>
<tr>
<td><strong>Up to 6 Points</strong></td>
<td>Partially engaged Vaulter/s. Basic interpretation of musical elements. Low level of expression in conjunction with musical elements, lacking variety. • Simple artistic concept can be identified but is only illustrated during few parts of the performance. • Simple body language sometimes connected with the music. Mostly simple gestures shown during stable and static positions. • Some moves are in line with the rhythm/beat and/or melody of the music but Vaulter/s is not responding to changes in rhythm, tempo or style within the music.</td>
<td></td>
</tr>
</tbody>
</table>
| Up to 4 Points | Executing Vaulter/s.  
Very limited/rudimentary/fairly poor interpretation of musical elements and body language. |
|----------------|-----------------------------------------------------------------------------------------------|
|                | • When showing dynamic elements and complex moves the focus is mostly on the execution of elements with little focus on rhythm/tempo/melody of the music.  
• Vaulter/s show/s some expression but does not demonstrate emotional engagement. |

| Up to 2 Points | Inexpressive Vaulter/s.  
No interpretation of musical elements. |
|----------------|------------------------------------------------------------------------------------------|
|                | • An attempt to implement an artistic concept can be recognized but it is not clearly identifiable.  
• Simple body language mostly not connected with the music.  
• Main focus is on execution of the elements. Almost no focus on rhythm/tempo/melody of the music.  
• Inexpressive postures and moves. |

<table>
<thead>
<tr>
<th>0-Points</th>
<th>No-Music is-played</th>
</tr>
</thead>
</table>
|          | • Artistic concept cannot be identified.  
• Very little body language and not matching the selected music.  
• No identifiable link with the music  
• No expression |

- **if Vaulters perform without music it might happen that the artistic concept could be recognized.**
### Deductions from Artistic Score

#### Deductions from Artistic Score Squad Free Test:

<table>
<thead>
<tr>
<th>0.5 of a point</th>

</table>

#### Deductions from Artistic Score Individual Free Test

| 1 point | For any exercise, including the dismount, commenced after the time limit (the bell) Not mounting again after a fall where the contact with the Horse is lost (no final dismount) Dress not compliant |

#### Deductions from Artistic Score Pas-de-Deux Free Test

| 1 point | For any exercises, including the dismounts, commenced after the time limit (the bell). Not mounting again after a fall where the Horse is empty (no final dismount) Dress not compliant with |
6. **TECHNICAL TEST**

6.1. **General**

The five required Technical Exercises are listed below. New exercises may be found on the FEI Website. Judging of the Technical Test begins with the moment the Vaulter touches the surcingle, the pad or the Horse and ends with touching the ground after the final dismount of the Vaulter.

6.2. **Requirement of the Technical Test**

The Technical Test consists of technical exercises and additional Free Test exercises, chosen by the Vaulter. The Technical Exercises may be shown in any order.

- Individual Senior 3* Vaulter must show all five of the Technical exercises, in any order.
- Individual 2* Young Vaulter must show three of the five technical exercises of their choice, in any order. If more than three technical exercises are shown, the first three performed will be scored as the technical exercises and any others will be counted as additional exercises.

6.3. **Scoring of the Technical Test**

6.3.1. **Technical Exercises**

For each Technical exercise a score is given according to the scoring criteria. The maximum score for each Technical Exercise is 10 points. Scoring may be in tenths. Specific faults in the Technical Exercises with penalties and deductions are listed in Chapter 3 "Scoring exercises" under point 3.5. "Specific Deductions in Compulsory (Comp) and Technical (Tech) Exercises".

6.3.2. **Performance of additional Exercises**

The Performance of the additional exercises and transitions must be considered in the Score for Exercises as a separate score. These exercises and the corresponding deductions will be recorded as per the Free Test (Average system).

Judging of the Performance begins the moment the Vaulter touches the surcingle, the pad or the Horse and ends with touching after the final Landing on the ground.

Only the exercises shown or started before the end of the time limit will be considered for the total number of exercises. The average of the deductions will be calculated to three decimals.

**Falls**

A Fall is a movement out of control which results in the Vaulter touching the ground and is assessed depending on its severity.

For categories of the Falls refer to the point 3.6. "Falls in Free Test and Technical Test".

The Falls will be recorded by the Exercise Judge and penalised by a deduction from the Performance Score. The deduction for a fall is not averaged but is deducted at the end. See Example for Average System in Free Test.

The Falls are recorded on the score sheet by writing down an “F” and the deduction.
6.4. Description of the Technical Exercises and Scoring Criteria

6.4.1. Stand Backward (Balance)

Stand backward on the back of the Horse with a static arm position.

**Essence:**

Harmony with the Horse  
Balance  
Body Control & Posture

**Mechanics:**

The Stand Backward is a static exercise and comprises one biomechanical phase:

1. The static phase starts when the static position is displayed

The static phase and the count of the canter strides starts when the static position is displayed.
- The canter movement is absorbed by the Vaulter, mainly through the joints from feet to hip. The joints of the legs are bent just as much as necessary for absorbing the changes of the elevation of the Horse's back.
- The upper body remains in a physiologically correct posture. The shoulders, pelvis and the feet stay in a transversal plane parallel to the surcingle.
- The legs are parallel to the median plane of the Horse. The knees and feet are at hip-width and point backward. The feet remain stationary, and the weight is evenly distributed over the entire soles of both feet throughout.
- **The arms are in any static position.** The body remains supple and free from any tension other than the muscle action needed to absorb the canter and to keep the described posture. The Vaulter is in a stable and controlled position.

Stand Backward is to be held for three canter strides and the exercise is completed after the 3rd canter stride. Faults after the 3rd canter stride will be marked as performance faults in the additional exercises (e.g. fall within the 4th canter stride)

<td>❌ Absorption: minor lack of absorption (e.g., minor tension in the upper body and/or legs)</td>
<td>❌ Balance and Stability: weight unevenly spread over the feet for a short moment (~1 canter stride)</td>
<td>❌ Posture: minor deviation in arms and/or shoulders position</td>
</tr>
<tr>
<td></td>
<td>❌ Posture: Legs not completely parallel to median plane (e.g., knees or feet not hip width apart – slightly too wide, too narrow)</td>
<td>❌ Upright standing position, but the joints of the legs are bent more than necessary for compensating the change in elevation of the Horse’s back.</td>
<td>❌ Posture: Knees closer together or wider than feet</td>
</tr>
</tbody>
</table>
 Balance and Stability: small step (shorter than one foot) and immediately back

**Absorption:** Lack of absorption, not in rhythm

Balance and Stability: too much weight on toes, heels or one foot (~2 canter strides)

Balance and Stability: big step (longer than the Vaulter’s foot) and immediately back

Balance and Stability: small step and stay (shorter than the Vaulter’s foot) and stay in step position

Balance and Stability: a small hop with both feet

**Posture:** upper body 45° in front of the vertical

Balance and Stability: most of the weight is on toes, heels or one foot for most of the exercise throughout

Balance and Stability: big step and stay (longer than the Vaulter’s foot) and stay in step position

**Balance and Stability:** big hop and stay

**Absorption:** Major lack of absorption (e.g., minimal absorption throughout the whole exercise)

Balance and Stability: major loss of balance: major jump affecting the comfort of the Horse, continuously stepping, hopping/jumping more then twice

**Posture:** upper body more than 45° in front of the vertical AND major deviations from the physiologically correct position of the spine

**Standing on the neck or surcingle with one or both feet throughout**
6.4.2. Cartwheel Movement from Neck to Back (Time/Coordination)

**Essence:**
Harmony with the Horse
Quality of movement
Body control and posture

**Mechanics:**
The Cartwheel movement is a dynamic exercise and comprises 4 phases:

1. **Energy phase**: starts with the stand backward on the neck on one foot, hands on top of the handles
2. **Rising phase**: starts when feet lose contact with the neck
3. **Lowering phase**: starts when lowering the first (swinging) leg
4. **Landing phase**: starts when touching the Horse’s back with the foot of the first leg

**Energy phase:**
**Starting position of the exercise**: standing backward on one foot (second and supporting leg) on the Horse’s neck, both hands holding on top of the handles, the first leg (swinging leg) is stretched and pointing down. The arms are extended and remain stretched during the energy phase.

The first leg is swung upwards. The second leg pushes off the neck and follows clearly delayed.

**Rising, Lowering phase:**
During the Rising phase (from the moment the second leg loses contact with the Horse) and the Lowering phase (until the first leg touches the Horse) the distance between the legs remains consistent and open wide. (see graphics). The main focus is on the consistency of the angle between the legs, which ensures that the movement remains fluid.

During the rising and lowering phase, the legs are moving fluently and remain stretched, while the upper body executes a smooth swing and turn. The Vaulter moves through a balanced split-legged handstand position, with the hip axis parallel to the longitudinal axis of the Horse at the beginning of the Lowering phase; arms, shoulders, hips and upper body are aligned. As the vVaulter turns the arms twist and cross, the first leg bends in the hip joint and the legs are lowered slowly and under control.

During all phases, the cartwheel movement is executed along the Horse’s median plane, with a physiologically correct posture and straight body line.

**Landing phase:**
The first leg lands softly onto the sole of the foot, in a controlled one leg standing position with both hands on the handles, forward on the Horse’s back, absorbing the movement of the Horse. The second leg follows in a controlled and fluid movement.

**End position of the exercise:** The cartwheel ends when the vVaulter has shown a forward standing position on the first leg, on the Horse’s back, for at least one canter stride.

Upon landing, the first leg is in a position similar to the one described for the compulsory exercise Stand from hip to toe, and it softly absorbs the canter movement; both hands are holding on top of the handles.

The second leg can perform any position or movement, after it has passed below an angle of 45° relative to the horizontal.

<table>
<thead>
<tr>
<th>Score</th>
<th>Details</th>
</tr>
</thead>
</table>
| 10    | ✔ The Cartwheel movement is fluid, uninterrupted and harmonious with the Horse’s movement.  
 ✔ The Vaulter’s center of gravity remains over the center of the supporting area and the whole body moves along the median plane of the Horse throughout.  
 ✔ Correct posture  
 ✔ The arms are extended and remain stretched during the Rising phase.  
 ✔ At the beginning of the Lowering phase, the Vaulter’s hip axis is parallel to the longitudinal axis of the Horse.  
 ✔ During the Rising and Lowering phase, once both legs have lost contact with the Horse, and at the beginning of the Lowering phase, until the first leg touches the Horse, the distance between the legs remains consistent and open wide.  
 ✔ Landing: soft onto the Horse’s back with the sole of the foot of the first leg. |
| 8     | ✔ The Cartwheel movement is fluid, uninterrupted and harmonious with the Horse’s movement.  
 ✔ During the Rising and the Lowering phase the distance between the legs remains consistent and open wide until the Landing phase.  
 ✔ Landing: soft onto the Horse’s back with the sole of the foot of the first leg.  
 ✔ The Vaulter’s center of gravity is above the center of the supporting area, but some parts of the body are not totally in line with the median plane (upper body less than 10° of the median plane)  
 ✔ Minor deviation from the physiologically correct posture and straight body line of the Vaulter  
 ✔ The arms and legs are not necessarily fully stretched during Rising and Lowering phase.  
 ✔ At the beginning of the Lowering phase, the Vaulter’s hip axis is not completely parallel to the longitudinal axis of the Horse. |
| 6 | The Cartwheel movement has a medium interruption in the movement of one or both legs.  
   - The angle between the legs during the Rising and Lowering phase is too narrow, preventing the Vaulter from executing a fluid and continuous rotation.  
   - The Vaulter’s center of gravity is not always above the center of the supporting area, and some parts of the body are not in line with the median plane (angle between upper body and median plan 30°).  
   - Medium deviation from the physiologically correct posture and straight body line of the Vaulter  
   - Medium deviations in leg and arm extension during Rising phase.  
   - At the beginning of the Lowering phase, there is a significant angle between the Vaulter’s hip axis and the longitudinal axis of the Horse (not parallel).  
   - Landing: medium deviation in control |
| 4 | The Cartwheel movement has a major interruption in the movement of one or both legs.  
   - The Vaulter’s center of gravity is never above the center of the supporting area, and the body is not in line with the median plane (angle between upper body and median plane 60°).  
   - Major deviation from the physiologically correct posture and straight body line of the Vaulter  
   - Major deviations in leg and arm extension during Rising and Lowering phase.  
   - During the Rising and the Lowering phase the distance between the legs varies significantly.  
   - Landing: hard onto the Horse’s back with the sole of the foot of the first leg |
| 0 | Landing other than described:  
   - not on the sole of first foot only (e.g. landing directly in prince position)  
   - second leg before the first leg  
   - showing the end position for less than 1 canter stride  
   - Not facing forward: more than 45° between the direction of the first leg (indicator = direction of the knee) and the Median plane of the Horse. (landing with the foot/knee turned out more than 45°)  
   - Using other parts of the body than hands and feet for support |
6.4.3. Lower Arm Stand Sideways (Strength)

Essence:
Harmony with the Horse
Body Control & Posture
Balance

Mechanics:
The **Lower Arm Stand Sideways** is a static exercise and comprises 1 biomechanical phase:

1. **Static phase** starts when the static position is displayed

The Static phase and the count of the canter strides start when the static position is displayed.

- Each hand holds a separate handle; one lower arm is flat on the pad.
- The weight is mainly supported by the lower arm of the arm in contact with the pad. The elbow of the other arm is above the supporting hand, which is holding on top of the handle.
- The center of gravity is above the middle of the supporting area
- The shoulder line and pelvis of the Vaulter are parallel (physiological posture, including the head) and nearly parallel to the Horse's longitudinal axis.
- The Vaulter's longitudinal axis is parallel to the Horse's median plane and in a 90° angle with the Horse's longitudinal axis.
- If the exercise is performed on the right lower arm, the Vaulter's chest is facing to the inside of the circle. If it is performed on the left lower arm, the Vaulter's chest is facing to the outside of the circle.
- The legs are stretched and closed throughout.

Lower Arm Stand Sideways is to be held for three canter strides and the exercise is completed after the 3rd canter stride. Faults after the 3rd canter stride will be marked as performance faults in the additional exercises (e.g. fall within the 4th canter stride).

- ✔ required
- ✖ deviation entailing corresponding Reference Score
Significant deviation in posture.

Minimal absorption throughout: lower arm repeatedly lifting off the pad.

Major deviation in posture: major hollow back, sagging waistline

Hips strongly bent

Balance and Stability: Major loss of balance.

Angle between the shoulder line and the Horse's longitudinal axis more than 45°

Angle between the tights more than 45°

Deductions:

| 3 Points | Hand not held on top of the handle but in the handle |

6.4.4. Mount to Reverse Shoulder Stand (Jumping Force)

May be shown as a mount or as a ground jump, inside or outside.

**Essence:**
Harmony with the Horse
Quality of movement
Body control and posture

**Mechanics:**
The *Mount to Reverse Shoulder Stand* comprises 3 biomechanical phases:

1. **Jump phase** starts when the Vaulter jumps off
2. **Swing phase** starts when feet lose contact with the ground
3. **Landing Phase** starts when the top of the shoulder touches the Horse’s back and ends when the shoulder stand position is reached
1. **Jump phase:** With the hands gripping **one or both handles**, the Vaulter jumps off with both feet side by side, close to the Horse. The upper body is upright.

2. **Swing phase:** The knees, heels, and toes stay close together from the moment the feet have left the ground and the upper body remains in a physiological posture. While rising, the shoulders move in the direction of the Horse’s back and the pelvis lifts higher than the shoulders. Only the arm that is closer to the Horse can touch it. The center of gravity (CoG) moves up and over the Horse, along a Transversal plane of the Horse (where the Vaulter jumps off); the legs are first bent to a tuck position during the Swing phase.

3. **Landing phase:** The top of the shoulder touches the Horse’s back, and the shoulder lands softly on the Horse’s back, while the hips keep moving further upward. If both hands were on one handle during the Jump phase, one hand changes to the other handle in a fluent movement so that each hand grips on a separate handle. The legs straighten out by the end of the Landing phase in a fluent continuous movement.

**The end position of the exercise:** balanced reverse shoulder stand on one shoulder, on the Horse’s back. The Vaulter’s Frontal plane is parallel with the Transversal plane of the Horse. The upper body is in a physiological posture, and the legs are vertical, closed, and straight. Both upper arms are close to the Vaulter’s upper body. This position must be reached within the third canter stride from the start of the jump phase and is to be held for three canter strides with legs closed.

The **Mount to Reverse Shoulder Stand** is to be held for three canter strides and the exercise is completed after the 3rd canter stride. Faults after the 3rd canter stride will be marked as performance faults in the additional exercises (e.g. fall within the 4th canter stride).

---

### Chart

<table>
<thead>
<tr>
<th>Landing Phase</th>
<th>Swing Phase</th>
<th>Jump Phase</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>✔ Jump, Swing and Landing phase completed within 3 canter strides</td>
<td>✔ Excellent fluidity, CoG moves up along a Transversal plane of the Horse (where the Vaulter jumps off)</td>
</tr>
<tr>
<td></td>
<td>✔ In Jump and Swing phase: correct leg movement and posture.</td>
<td>✔ Soft Landing on the shoulder and correct absorption of the canter movement in shoulderstand. The Vaulter's shoulder lands softly on the Horse's back, and the body absorbs the canter movement during the shoulderstand.</td>
</tr>
<tr>
<td></td>
<td>✔ In shoulderstand: correct posture.</td>
<td>✔ End position: correct posture AND Vaulter's Frontal plane is parallel with a Transversal plane of the Horse.</td>
</tr>
</tbody>
</table>
In Jump, Swing, and Landing phase: slight deviation in leg movement: heels, legs, and toes not closed throughout.

In shoulderstand: upper arms not close to the upper body.

End position: Vaulter's Frontal plane is parallel with the Transversal plane of the Horse.

---

Minor deviation in fluidity

Minor deviation of the CoG from the optimal trajectory: minor travels back during the Swing and/or Landing phase; shoulder blade touches the Horse, but posture is correct in shoulderstand

In Jump, Swing or Landing phase: minor deviations in leg movement: heels, legs, and toes not closed throughout

End position: minor deviation from correct posture, body alignment, or position; the Vaulter's Frontal plane is not completely parallel with the Transversal plane of the Horse

---

Jump, and Swing and Landing phase completed within 4 canter strides

---

Medium deviation in fluidity

Travels back during the Swing and/or Landing phase; the side of the torso/pelvis touches the Horse (without pushing off)

A leg touches the Horse or surcingle during the Swing phase (without pushing off)

End position: medium deviation from required alignment of Vaulter's Frontal plane and the Transversal plane of the Horse: angle of 30°

6.4.5. Stand Split Backward (Suppleness)

**Essence:**

Harmony with the Horse  
Suppleness  
Balance

**Mechanics:**

The Stand Split is a static exercise and comprises 1 biomechanical phase:

1. **Static phase** starts when the static position is displayed

The Static phase and the count of the canter strides start when the static position is displayed.

- The entire sole of the supporting foot is on the Horse’s back. The supporting leg is straight; it is close and parallel to the Horse’s Median plane and nearly vertical.
- The Center of gravity is in the Horse’s Median plane.
- The hands are flat on the pad/back/croup in a Transversal plane of the Horse. The shoulders are also in a Transversal plane of the Horse.
- The playing leg is stretched and points upward close and parallel to the Horse’s Median plane; the angle between the supporting leg and the horizontal is 90°.
- The upper body remains in a physiologically correct posture and in the Horse’s Median plane.
- The canter movement is absorbed by the Vaulter, especially through the arms and pelvis. The joints of the arms are bent just as much as necessary for absorbing the changes to the elevation of the Horse’s back.

Stand Split Backward is to be held for three canter strides and the exercise is completed after the 3rd canter stride. Faults after the 3rd canter stride will be marked as performance faults in the additional exercises (e.g. fall within the 4th canter stride)

</table>

| 1 point | For any exercises, including the dismount, commenced after the time limit (bell) Not remounting after a fall where the contact with the Horse is lost (no final dismount). |

**T1 Scoring  Individual Senior 3***

1. The Technical Test is divided into six sequences, the first from the mount to the first Technical Exercise, 4 sequences from one Technical Exercise to the next one and finally from the last Technical Exercise to the dismount.

2. Each of the sequence receives a score. This score represents the following criteria: Difficulty and/or Originality and individuality of an element and/or sequences of elements and/or transitions.

3. If the Vaulter's first mount is Technical Exercise, (example Mount to Shoulderstand) then the first sequence receives a score of 5.

4. If a Technical Exercise is not performed (not shown at all), the missing sequence will be scored zero.

**T1 Scoring  Individual 2* Young Vaulters**

1. The Technical Test is divided into four sequences, the first from the mount to the first Technical Exercise shown, 2 sequences from one Technical Exercise to the next one, and finally from the last Technical Exercise to the dismount.

2. Each of the four sequences receive a score. This score represents the following criteria: difficulty and/or originality and individuality of an element and/or sequences of elements and/or transitions.

3. If the Vaulter's first mount is a Technical Exercise, (example mount to Shoulderstand) then the first sequence receives a score of 5.
4. If any of the three required Technical Exercises are not performed (not shown at all), the missing sequence will be scored zero.

</table>

The scores T1 to T3 will be written down on the score sheet and the scoring office will calculate it.

For Individual 3* Vaulters, the total score for T1 is the average of the 6 sequences calculated to 3 decimals.

For Individual 2* Young Vaulters, the total score for T1 is the average of the 4 sequences calculated to 3 decimals.

**Base Score T1**

<table>
<thead>
<tr>
<th>Base Score</th>
<th>Number of Exercises required per base score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 2</td>
<td>NO exercise or transition</td>
</tr>
<tr>
<td>Up to 4</td>
<td>ONE exercise or transition</td>
</tr>
<tr>
<td>Up to 6</td>
<td>ONE or MORE exercises or transitions where at least ONE meets criteria</td>
</tr>
<tr>
<td>Up to 8</td>
<td>ONE or MORE exercises or transitions where at least ONE meets increased criteria compared to &quot;Up to 6&quot;</td>
</tr>
<tr>
<td>Up to 10</td>
<td></td>
</tr>
</tbody>
</table>
**Complexity:** refers to the Degree of Difficulty of the exercise or the risk a transition may incur. Also a combination of multiple transitions might represent a certain complexity within the Technical Test.

**Originality:** exercises, transitions and/or the combination of them which may be unique. Originality can also come from an artistic element supporting music interpretation.

**Connectivity:** refers to the smooth connection between two exercises or transitions where no interruptions can be seen and the harmony with the Horse is sustained. Lack of connectivity (disruption) will have a negative impact on the Artistic score.

**Note:**
- After the end of the time limit, only the dismount will be evaluated for the last sequence.

**Deduction:**

| 1 point | Dismount performed after the time limit |
Annex I Degree of Difficulty

Degree of Difficulty in Individual Vaulting Free Test

The 10 most difficult exercises should be taken into consideration for the Degree of Difficulty in the individual Free Test. The maximum score for Degree of Difficulty is 10.
