EVUSA RULES FOR VAULTING

Rules for Vaulting are the rules for the performance of the sport of vaulting. Rules for Vaulting are developed by the Technical Committee and presented to the Board of Directors for consideration and, upon concurrence, adoption.

CHAPTER I. GENERAL

Article 101. Introduction.
1. Vaulting: The art of gymnastics/dance on the moving horse. The competition is judged on the smooth and correct execution of the compulsory exercises, freestyle programs and technical tests by the vaulters in sympathy and harmony with the horse working on the lunge line.
2. Harmony with the Horse: is achieved by performing every movement, compulsory or freestyle, in unity with the horse. A horse’s movement produces significant power and inertia, and harmony is achieved when a vaulter balances their strength and suppleness to synchronize with that movement. The objective is to create a cohesive unit consisting of the Lunger, Horse and Vaulter(s) working as one, with vaulter(s) moving in accord with and causing no adverse effect on the horse. The horse should be a willing partner totally accepting of the vaulter(s) with uninterrupted balance and free flowing movement.

CHAPTER II. COMPETITION

Article 201. Competition Recognition.
1. All EVUSA Recognized Competitions must have completed procedures for recognition as per Standing Rules. (See Standing Rules, Section VIII – Recognized Competitions).

These documents must be made available to Competition Management prior to the start of the first day of competition for any USEF competition.

However, they may not receive overall awards or placings.

      iii. After one excusal, the horse may return in subsequent classes.
      iv. After two excusals on the same day, the horse is excused for the remainder of that day and may not return in subsequent classes.
      v. If the competition is longer than one day, horses may be presented again in subsequent days.

APPENDIX D

DESCRIPTION OF “D” COMPULSORIES

MODIFIED BASIC SEAT

Essence:
- Harmony, balance, seat and posture
The vaulter sits astride, erect, and centered directly behind the surcingle, with legs down and in contact with the horse, forming a straight vertical line through the ear, shoulder, hip, and heel. The arms are extended and stretched forward with the tips of the fingers at eye level, keeping shoulders back (good posture). The vaulter should establish a seat, where two-thirds of the weight is distributed equally on the two seat bones and one-third is distributed down the legs.

Basic Scoring:
- Score of 10 - Three-point seat with torso upright, legs down and in contact with the horse, forming a straight vertical line through the ears, shoulders, hip and heel and following the horse’s movement perfectly. Arms out front, fingers at eye level.
- Score of 6 - Three-point seat with torso upright but with slight posture issues. The horse’s movement is absorbed satisfactorily.
- Score of 5 - Extreme legs forward or “Chair Seat”
- Score of 4 - Extreme arched back and no weight on seat bones. Bracing of legs to keep from falling forward (Remember arms are forward). Classic forked seat.

Deductions –
- -2 Points: Wrong arm position in basic seat, side seats and kneel

BOX

Essence:
- Establishing good base of support for flag
From seat astride, the vaulter swings into box, with both legs simultaneously, landing first on the tops of the ankle and slowly lowering to the shin and knees. Legs are on either side of the horse’s spine with weight distributed evenly. Toes are pointed and conforming to the horse’s back. Shoulders are directly over the hands and at the same height as the hips, with the elbows close to the torso. Hips are nearly at a 90-degree angle from the torso to the upper leg and are directly above or slightly behind the knees. Head remains up facing forward.

Basic Scoring:
- Score of 10 - Vaulter swings upward, landing softly into box. Lower legs are completely against the pad and horse. Shoulders are at same level as hips and back is straight. Elbows are tucked in and head is lifted.
- Score of 8 - Shoulders are slightly higher than hips but back is still straight.
- Score of 6 - Shoulders clearly higher than hips with slight arching or rounding of the back. Some air under lower leg.
- Score of 4 - Shoulders well above hips. Arched back with lower legs off the horse. Elbows turned outward.

Deductions –
- Up to -2 Points: For little to no swing into Box, Swing to Forward Plank and Reverse Plank

QUARTER MILL TO INSIDE SIDE SEAT

Essence:
- Harmony, balance, seat and posture
From seat astride the vaulter makes a leg pass to the inside with the right leg completely stretched. The leg is carried over the horse in a high, wide arc (like a semi-circle), each handle is released and retaken in turn as the leg passes. The mill ends in inside seat with legs together and in contact with the horse. The upper body stays erect and centered. Head and body rotate with each pass of the leg. Both hip bones stay in contact with pad during entire exercise. There are no timing faults for the leg pass in the quarter mill.

The vaulter sits in an inside side seat with arm out for four (4) strides. The vaulter is facing at a right angle to the horse’s shoulder axis. The right hand is moved to the inside grip. The left hand is extended out laterally with the tips of the fingers level with eyes. The right leg is carried back over the horse’s neck at a controlled pace. Leg stretches softly down to wrap. The exercise is completed with the vaulter sitting forward in seat astride.
**Basic Scoring:**

- **Score of 10** - Leg is fully stretched and at or above 45 degrees as it passes over handles. Torso is nearly vertical with good posture. Vaulter maintains posture in inside side seat with arm out (and inside handle is being held). Legs are against horse and together.
- **Score of 8** - Leg is slightly less than 45 degrees but is still stretched. Good form and posture are maintained throughout. Form is good in the side seat. Score of 6 - Slight loss of form and posture during leg pass and side seat. Legs slightly apart but still against horse. Satisfactory harmony in seat.
- **Score of 4** - Poor form or posture. Elevation of leg is very low. Not able to properly sit in the side seat with arm out (lacking harmony in the side seat)

**Deductions –**

- -1 Point: Holding wrong handle in side seats
- -2 Points: Wrong arm position in basic seat, side seats and kneel
- -2 Points: Touching pad behind the horse in Quarter Mill

**QUARTER MILL TO OUTSIDE SIDE SEAT**

Same as above; except the left leg is carried over the horse’s neck to the outside and ending with the vaulter sitting in a sideways seat facing outside. The left hand moves to the outside handle and the right hand is extended laterally. Finally, the left leg is carried back over the horse’s neck, landing back in forward seat astride.

Base scoring and deductions the same as Mill to the Inside Side Seat

**SWING TO FORWARD PLANK**

**Essence:**

- Initiating swing, core strength and control

Stretching both legs forward, the vaulter swings through an arc in an upward direction. The upper body remains upright and the legs remain straight throughout the movement. Vaulter hovers momentarily above the horse before landing softly in plank with the tops of the feet together on the horse’s croup and shoulders in front of or directly above the hands. Body forms a stretched line from the top of the head to the hips and from the hips to the heels with a flat back. Legs are together and on either side of the horse’s spine. The shoulders are in front of the handles with the arms straight. The vaulter’s weight is mostly in the arms with the remainder on the stretched foot and ankle. After four strides, the vaulter bends the knees to begin modified kneel.

**Basic Scoring:**

- **Score of 10** - Vaulter holds the stretched and slightly curved hollow body position without losing tension (sagging in middle). Arms remain straight and shoulders stay in front of handles. Legs are held together throughout exercise.
- **Score of 8** - A brief loss of core tension during the exercise.
- **Score of 6** - The slightly curved line is broken at the hips (slight arched back or flexed hip) but held steady. Legs slightly apart.
- **Score of 4** - An extreme break in the back/hips or loss of core tension. Legs apart and/or knees bending.

**Deductions –**

- Up to -2 Points: For little to no swing into Box, Swing to Forward Plank and Reverse Plank

**MODIFIED KNEEL, SCISSOR DOWN TO REVERSE SEAT**

**Essence:**

- Balance, security and control

The vaulter slides the knees forward and directly under the hips with the lower legs angled slightly outward. The vaulter’s weight remains evenly distributed along the lower legs. Upon releasing handles the arms are extended and stretched forward with the tips of the fingers at eye level. The hips press forward into a kneeling position, forming a straight line between the head, shoulders, hips, and knees.

After four strides, the vaulter takes the grips with both hands simultaneously, then shifts weight forward and over the hands. Vaulter straightens legs, lifting hips into the air momentarily, then crosses the outside leg in front of the inside leg, turning the hips to the inside, and slides down to reverse seat. Vaulter maintains in controlled contact with horse from the ankles through the knees and seat.

**Basic Scoring:**

- **Score of 10** - Kneeling directly behind surcingle with lower legs flat, knees together and feet slightly apart. Straight line from ear to shoulder to hip and to knee. Excellent posture with hands at eye level.
- **Score of 8** - Slight separation of knees. Slight break in line at hips.
- **Score of 6** - Clear separation of knees. Arms too high or low. Some weakness in posture. Some flexion of hips.
• Score of 4 - Hips flexed around 90 degrees. Lower legs coming off the pad. More than 90 degrees of hip flexion and posture issues. Loss of form.

Deductions –
• -2 Points: Wrong arm position in basic seat, side seats and kneel
• -2 Points: Turning wrong way in Scissors down from Kneel, posture and arms.
• Base scoring and deductions are the same as Mill to Inside Side Seat

REVERSE PLANK WITH QUARTER MILL DISMOUNT TO INSIDE

Essence:
• Initiating swing, core strength and control
Beginning in a reverse seat with hands on top of the handles, the vaulter pushes into an arced position with the shoulders reaching up and away from the surcingle. The vaulter swings the legs toward the croup with the shoulders traveling past the surcingle toward the horse’s neck. The vaulter swings with a hollow body and lands softly into Reverse Plank with the feet together. Facing upward, the body forms a stretched line from the top of the head through the hips and ankles. With hands on top of the handles, the vaulter’s arms are stretched with the shoulders above or slightly behind the handles. Legs are together with feet on either side of the horse’s spine. The head is the extension of the longitudinal body axis. After four strides, the vaulter slides down to reverse seat, keeping the hips elevated until the body is vertical directly behind the surcingle. From seat rear ways, the vaulter performs a reverse quarter upper right leg and with closed legs and stretched hips, the vaulter pushes against the handles upwards and away from the Horse. The handles are released and the vaulter lands with legs hip width apart, hips and shoulders parallel to the horse’s shoulders. The upper body slightly bent forward in the absorption phase of the landing and continues in a controlled run in the same direction as the Horse.

Basic Scoring:
• Score of 10 - A swing that lands lightly on the horse’s croup in a straight body plank position. Shoulder blades pulled together and head in line with torso and legs. Strength and tension are maintained throughout exercise. Legs are held together. Body lowers into Reverse seat with control. There is height and stretch during leg pass.
• Score of 8 - The swing lands lightly. Strength and tension are maintained but head is not in line. Legs are slightly separated. Return to reverse seat is not as stretched and controlled.
• Score of 6 - Swing lands lightly but body is not as tense and there’s some bend in hips. Legs are not completely together. Leg pass to inside seat has form but is lower than 45 degrees.
• Score of 4 - Swing into reverse plank does not land lightly onto croup. Shoulders are rounded and there is a break in the line at the hips. There is a constant lack of tension and security. Leg pass is lacking form and elevation.

Deductions –
• Up to -2 Points: For little to no swing into Box, Swing to Forward Plank and Reverse Plank
